First Edition May 2020

SAN ANTONIO, TEXAS

20TH JANUARY 1820

ALAMO

URGENT DISPATCH

FOR GENERAL JAKSON,

CANDIDATE TO THE WHITE HOUSE

LEADER OF DEMOCRATIC PARTY.

TELEGRAM SENT FROM

MEDICAL CAPTAIN J.C.,

SEVENTH CAVALRY REGIMENT, U.S.

SOLE SURVIVOR

MASSACRE OF LITTLE BIG HORN, MONTANA,

THIRTY MONTHS AGO,

IN DATE 24TH MAY 1817,

PERPETRATED FROM

SHOUX BANDS OF MAD HORSE.

FROM APRIL 1819

ALAMO UNDER SIEGE OF GENERALISSIMO

SANTA ANA DE LAS NOCES.

TO BE QUICK. STOP.

Alamo, Texas, 2nd February 1820

Medical Captain J.C.,

Seventh Cavalry Regiment, U.S.

After a whole Day of harsh and violent fighting against the Sioux Indians of Mad Horse, our Seventh Cavalry Regiment had entrenched itself in a short Section of a Moat, hopelessly fighting off the endless Assault led by Mad Horse.

The low and green Hills of Montana, surrounding that short Section of the Moat, were now blackened by the dead Corpses of Hundreds of Sioux Warriors, who had fallen under our Strikes...

But Hundreds more Sioux, who, in the last few Hours, had become several Thousands, were now crowding the Horizon to as far as the Eye could see, standing along the great Ridge overlooking our Position, only One Kilometer away.

They were only awaiting the Order of Mad Horse for the final Attack.

Below, toward Us, the red-ocher human Tide of further Thousands of Sioux, already descending from those Hills...

It was the End.

What remained of the Seventh Cavalry Regiment, led by General George Custer, was now completely surrounded, and close to total Annihilation and Destruction.

The Sun was setting on that 24th May 1817, for the few of Us still alive.

The Others, outside of Time, were lying headless, slain and slaughtered along the great Crest of the Moat where We had attempted an empty, pointless, vain Retreat.

In that brief Moment of relative Truce, while the wild Shouts of Sioux, now certain of their Victory, could already be heard, I was reached by an Messenger "Disphitch-Rider", tired and exhausted, and told that I had been summoned urgently to Report by General Custer, for a very and important Order...

When I got to him, a short while later, the Fusillade of our Winchester, repeating Rifles, which had already started to enfilade the Crowds of Indians climbing the Ridge covered by Hundreds of their Comrades' dead Corpses, barely allowed me to understand the few Words that General George Custer had Time to tell me, while giving the last Dispositions to the remaining Officers, before the final Fight ...

I didn't want to leave my Post...

But, in War, an Soldier must always obey Orders, no matter what They are, even if They go against One's Ideas, Beliefs, Convictions, Certainties, Ethics...

It was the last Order my Father gave me.

Before He disappeared forever into the final fight of the Battle, He briefly turned to me, and said :

- Remember your Mother, ... She's the Reason We went to War, fifteen Years ago...

He then said goodbye in his usual way, formally, as was appropriate between Men, vigorously shaking my Hand and smiling, as if He was going to a Friend's Party...

I was crying, while the poisoned Arrows of Mad Horse's Sioux were raining everywhere, and I kept wondering how long I still had to live, while I ran away from the Moat brimming with dead Corpses, and wounded Soldiers in Agony, now close to death, lying in the red Mud of the Trenches...

The Regiment of my Father was no more.

Some Day later, on 3th June of that terrible 1817, the Director of a local "Giornale" in Tucson, Arizona, published the Piece of News that the Son of General George Custer had lost his medical License, and warned All of Arizona to be suspicious of me. It seemed there was also a Bounty on my Head, "Dead or Alive" ...

Obviously, the Piece of News of how I lost my medical License was fake: I had simply stopped practicing in the medical Profession obeying to the last Order, peremptory and definite, of my Father, General George Custer, in Little Big Horn, on the Evening of 24th May 1817...

And the American Frontier had fallen: Mad Horse was burning down whole Villages from Montana along the Missouri River, reaching the Mississippi River and San Louis, which was already under his Control, killing Men, Woman and Children...

Meanwhile, in the South, in distant Texas, Generalissimo Santa Ana de Las Noces was marching victoriously with his Mexican "Armades" towards San Antonio, where Crockett, Travis and Bowie were desperately gathering the last American forces around an old Spanish Church, called with the Name of the "Alamo".

We were losing the War...

Many Patriots had already died and many more had betrayed Us, siding with the Enemy, although I had marked ALL their Names...

And I was now the Conveyer of those shameful and dishonorable Names.

They were neatly recorded in the my Agenda I kept hidden under the Saddle of my Horse, just in case I was captured, while I rushed at full Gallop to the Alamo, to hand to Colonel Crockett this long List of those damned Traitors...

I found Jim Bowie in the Infirmary of the Monastery, as well as Colonel Travis.

While Davy Crockett seemed to be the only one able to shoulder his legendary Rifle and climb on the boundary Wall of the Alamo for one last, symbolic Defense, only to end it before Thousands of mexican Soldiers, who were assaulting that old Monastery that, in its ruined state, was no longer able to offer much Defense...

It was then, in that terrible April of 1819, as We were fending off the first mexican Assaults on the Alamo, that We received the incredible Piece of News that General JAKSON was running for President of the United States, against his republican Rival...

I saw People like Davy Crockett, Jim Bowie, Travis and many Others whom History shall never remember, shed tears of Joy on those Wall, on hearing the Piece of News.

And for three Days the Mexicans stopped sending Soldiers under the Wall of the Alamo, as if the mere Name JAKSON was enough to defend Us...

For the first Time the mexican Soldiers of Generalissimo Santa Ana de Las Noces were starting to Fear Us...

But the Situation remained very difficult: General JAKSON needed any valid Vote He could get if He was to be elected President of the United States.

He would then have the Strength to build an new Army, to march West beyond the Mississippi River, and to rebuild a Strip of Frontier where could be pushed back the indian Bands of Mad Horse's Sioux...

Then go South, to Texas, and finally face on the Battlefield the "Armades" of Santa Ana de Las Noces, somewhere around San Antonio, thus freeing the Alamo from the Siege...

That's why We needed any valid Vote for the future Elections that were to take place a few Months later, in November, in what was left of the United States...

In the meantime Davy Crockett, Colonel Travis, Jim Bowie and the Others, me included, were going to keep resisting in the Alamo, while hoping General JACKSON was going to win the Elections...

And it was all because We had dared to believe.

Since We were Children.

We had believed in those Thirteen Settlements.

Thirteen poor Settlements.

Thirteen poor, far away Settlements.

Thirteen poor, far away, miserable Settlements...

Thirteen miserable Settlements that less than Fifty Years earlier, in 1776, under General George Washington, had been brave enough to establish themselves as an independent Nation, inhabited by free, equal Men and Woman, challenging England and its colonial, proslavery Empire.

They had waged War against it, and won, in order to build a Society that We all wished to be free and democratic, just like had been the Citadel of Athens, this of Platone, and then the republican Roma, at least that of Cicerone, and NOT of Nerone, before the "Romunes" themselves gave up their Freedom, entrusting all Powers to a single Man, the Emperor, and stripping of all Authority the sacred Senate of Roma, old of five Century, thus laying the ground for the imperial, proslavery and tyrannical Roma, denier of all Values, enemy and warmonger, oppressive and destructive under the bloody Throne of Emperors whose cruelty and violence knew no bounds...

But, the ancient Spirit of Platone's Athens and of Cicerone's republican Roma, did not die.

Four Centuries after the Death of Cicerone, and the End of republican Roma, in the old Gaul of Gallo-Romans and Frankies, united by the single Purpose of warding off the asian Invasions of Attila's Huns, and saving the Gaul from the Depths of Obscurantism, the old Laws of ancient Roma had been restored...

That is of the republican Roma, and NOT of imperial Roma.

Thus begetting the France of Today, divided in its ancient "Comtes" and "Marques" governed by Laws and Istitutions established on the basis of the most ancient Edicts of the republican Roma...

The ancient Spirit of the Platone's Athens, trasmigrated in the Cicerone's republican Roma, which had been embodied by the new France of Charle Magne, seemed then to reach the Thirteen miserable Settlements of Overseas...

Perhaps, the ancient western World dreamed from Greeks of Platone, from "Rommunes" of Cicerone, from Frankies of Charle Magne, was finally to be reborn, HERE.

Today, all european royal Courts refer the People of George Washington as "...miserable Villages de Outremer (Farms of Overseas) who eat strange Things called "Potatoes" and big Rosters, or big Fowls, called "Turkey-Cock", or "Dindons" ...

“... More savage than the very Savages they had found on those cold and inhospitable Coast, and whose Governors, appointed after the War They had won by Mistake against the most civilized Crown of England, refuse the Title of King or of Emperor, and ridiculously consider themselves simple State Employees, like common Citizen, instead of ruling like Monarchs, as They should. They have even started to profess the strange, absurd Idea that all Men are equal before the Law, contrary to what happens in civilized Europe. And are even convinced that None of them could be trialed, imprisoned and then killed for their religious Faith, something that in Europe rightly happens, since the religious Heresy is a Crime that must always be subject to exemplary Punishment, possibly at the Stake, it will become an extremely, dangerous Example of Subversion and Threat against the sovereign Authority, sacred and inviolable, which stands above all the human Law, and maybe divine Law...”

Yes.

*We are the miserable Villages de Outremer of this
Thirteen, miserable Settlements of Overseas...*

*And it's Cold, now, at Night, here, under the Wall of
the Alamo.*

I'm hungry, and I'm tired...

*But We can rest only a few Hours each, because there
are few of Us and We must keep guarding the enclosure
Wall and two small, old Cannons, We have placed on its
two Corners of the Monastery.*

Tomorrow will be 3th February 1820...

They say that Santa Ana de Las Noces is going to have the "Deguello" played in his final Assault against Us, because He will take no Prisoners. But there are still many Months to go, before the final Assault, and I pray God that JAKSON may win this Elections.

But that will be decided by the electoral Votes for JAKSON, in November.

I'm sending this Testament hoping it will be received and forwarded.

From People, With People, For People.

First Chapter: the Rain from Fukushima

Trieste, Italy.

30th April 2011.

Late Afternoon...

The old canadian PDA-2 Dosimeter by “Technical Associated” from Canoga Park, sitting near the Window in my old Kitchen, was marking an increasing Radiation Count: after so many Years, the Rain from Fukushima had once again brought to life the old data-analysis Processor of the Dosimeter I had bought Twenty Years before, when, after my Degree, I was getting ready for Four, tough Years of Study to Specialise in Nuclear Medicine in Milano.

The old PDA-2, uncalibrated after Years of Neglect, was now giving some totally unreliable Readings for *gamma* Radiation, 662 KeV, which it was picking up from beyond the window Pane: too high a Value to be normal...

The News of TV, Newspapers or Radio hadn't mentioned any Fallout's Levels which might be dangerous for Health, nor had any Precautions to protect public Health been put into Place, especially with regard to Children and pregnant Women, like the standard Restriction on Sale of Fruit and big leaf Vegetables, or even more on cow Milk: the strongest Concentrator of radioactive Isotopes, like Iodine 131...

This Time wasn't like 1986, everything seemed normal...

That's why I had no good Reason to worry: the canadian PDA-2 was just uncalibrated, surely.

It was the Evening of the 30th April: Forty Days had passed since the first radioactive Rain which had also hit Trieste in the Afternoon of Monday 21th March, colouring the afternoon Sky with that peculiar “cobalt-blue” Tinge I hadn't seen since the Events in Chernobyl in 1986.

And now the Rain was here again, and the Readings on the canadian PDA-2 Dosimetry were high once again ...

But it wasn't the Rain from Fukushima that kept Me up that Night.

I looked at my Phone: that Night, Nine Years of Hope were withering away under the pattering of the persistent radioactive Rain falling outside the Window of my old Kitchen...

I took the dated PDA-2 and reset the absurd Reading still flashing on the Display.

As I was turning it off, I was struck by a Memory I had buried, of Events that were somehow connected to that old Dosimeter...

Second Chapter: Piola Station

Milano...

A cold, wet Morning at the End of March 1992...

The “Linea Verde” (Green Line) of the Metroline “Romolo-Gobba” ...

The large Crowd getting off a “Piola”, as usual, finally emptying the Carriage...

That is why I liked that “Piola” Station.

After “Lambrate” Station, I had found a warm, dry seat also that Day.

The last Part of the Journey was going to be more comfortable until “Cascina Gobba” Station, so I decided to open the bulky light-blue Bag I had with Me, and see how my little Guest was faring.

From within the large Cage I had in my Bag I was met by Oscar’s happy Squeak.

Like any little Mouse, He was running around, curious about the new canadian Dosimeter.

I had installed with the Aim to measure, over Time, the Level of Radioactivity coming from the Animal, and especially of any X-Ray caused by the secondary Interaction from *beta* Rays...but the Display kept showing Zero Radioactivity from the Mouse.

I calmed down a Bit, and focused on Oscar: He was no longer the little Mouse I had seen less that a Month before, his Belly round due to the tumultuous, uncontrolled Growth of Millions and Millions of human cancer Cells which had injected in his Abdomen via small insulin Needles.

He didn’t move clumsily anymore, holding tightly to a Life He could feel slipping away, well-aware his Time was coming, his little, delicate Snout showing the Suffering caused by the feral, unstoppable Disease with which He had been affected...

But the Treatment He had undergone with radioactive monoclonal Antibodies seemed successful, as the Animal didn’t display any suspicious Bulge in his Belly, and kept sniffing my Dosimeter and running impatiently around the large Cage, all his for the Occasion.

As I saw later on at the Enclosure at “San Raffaele” Hospital, all that was left of the large malignant tumorous Mass which had grown inside of him in less than Twenty Days, was just a small, greyish Ball, slightly bigger than a Pea, and completely void of any vital residue of Cancer, as its Dissection revealed: the radioactive monoclonal Antibodies, which resembled some minuscule “Ys”, even smaller than the Size of a human Cell, had reached the Walls of the cancerous Cells, injected in the Belly of the small Animal, and left there to grow uncontrollably.

The radioactive monoclonal Antibodies, injected with insulin Needles, had tethered like microscopic radioactive Arrows to specific Molecules present only on human neoplastic Cells.

They remained attached for the following Five Days with their Molecules of highly radioactive Yttrium-90 contained in their Tails, and running out almost completely in a small Number of Days, just like minuscule Lamplights, all the while irradiating everything within a 3-millimetre Radius with lethal *beta* Radiations and burning anything close to the monoclonal Antibodies, themselves included.

The radioactive monoclonal antibody Treatment began to be used on Humans, in Milano, shortly after the End of the Experiments on Mice.

But the Laws of Nature are not made to be broken, and even if something works on Animals it does not strictly follow that it twill also work on human Beings.

In the End, it became clear that the Percentage of the radioactive monoclonal Antibodies capable of fixing on the Cancer and its Metastasis in human Beings, with a Weight of over 70 Kg compared to the insignificant Weight and Size of a Mouse, was completely insufficient to burn away the Cancer itself (Paganelli G., 2001).

Moreover, Part of the Radioactivity, the biotinylated metal Yttrium-90 carried by the monoclonal Antibodies, also spread to the Patient’s healthy Organs, like Liver, Kidneys and Bone Marrow, in a way similar to Chemo-Therapy.

The Effects on patients Lives were thus as final and terminal as those recorded in international scientific Literature had recorded since 1975, by Abel (Abel U., 1990), by Kearsley, who in 1986 reported not significant Improvement on Tens of Thousands of Patients (Kearsley J.H., 1986), or by Morgan, in 2004, on over 150,000 american Patients, whose life Expectancy after 5 (Five) Years from thr first Cycle of Chemo-Therapy was below 2% (Two per cent); (Morgan G., 2004).

Third Chapter: 2th January 2001

After what I had Experienced in Milano, I became aware that monoclonal Antibodies, when used exclusively to stimulate the immune Response, could be employed in a newer, simpler Way.

A Japanese study Group had proven as much, expecially with Regards to a specific Kind of malignant, metastatic bone marrow Tumour, called Multiple Myeloma.

It so happened that in that Period I had to face that very Disease, as I had to take medical Responsibility for my Mother, who on January 2th hadn't been able to get up from Bed, due to the sudden Fracture of Five thoracic Vertebrae, caused by the very same Multiple Myeloma, which They diagnosed at the Hospital a short while later (X-Ray and bone Biopsy).

In that terrible January of 2001, I learnt from a valuable little Booklet published also in Italian I had received by Mail from some american Friends (Professor Brian G.M. Durie, *International Myeloma Foundation*, 12650 Riverside Drive North-Hollywood, CA 91607), that an extremely low Percentage of People survived for more than 2-3 Years after being Diagnosed with this Disease, even after undergoing Chemo-Therapy, with or without a bone marrow Transplant.

This Booklet also reported the Bibliography of the latest and most recent english scientific Papers on Multiple Myeloma and, moreover, it highlighted important Information regarding recent Attempts to treat the Disease with Immuno-Therapy carried out through intravenous Infusion of japanese monoclonal Antibodies.

In many Animals (Rabbits), this Treatment was capable of inducing an immune Response mediated by Lymphocytes, resulting in complete Regression of the Disease even at an advanced Stage (Shuji Ozaki, 1999).

That's how, in January 2001, I got in Contact with the People who had produced those peculiar monoclonal Antibodies, People who lived on the other Side of the World: Japan.

All of this forced Me to come to terms with the unfathomable Reality of the Events which at Times take our Life in completely unforeseeable Directions.

Although communicating with One of the most important japanese Scientists on cancer Treatment was a taxing Experience, the official Phone-Call was carried out

strictly in their Language, it was made possible thanks to the kindness and invaluable Help of an elderly Lady from the Land of the Rising Sun.

Sitting beside Me in the wide Lounge of her House, carrying the Weight of her Family's traditional feudal Name, She expertly conducted the sensitive Phone-Call which could have decided the Life or the Death of my Mother.

This monoclonal Antibodies against Multiple Myeloma, created only in Japan, were the only thing in existence able to fully activate the immune Defences and completely Destroy in a few Months that terrible Type of malignant, metastatic Tumour.

I had taken my Request to the highest official Level I could reach.

Chemo-Therapy and Radio-Therapy had proven ineffective and counterproductive against that specific Disease.

Many Years have passed, but I can still recall the deep-rooted Sense of Honour that persists in that ancient and noble People.

It might have been the true Reason behind them calling us back, Half an Hour after We requested to use their most precious monoclonal Antibodies at the most important Cancer Treatment and Research Centre in Milan, namely "Istituto Europeo di Oncologia" (I.E.O), in Via Ripamonti, which had already given their Availability in employing the innovative monoclonal Antibodies.

The first official Phone-Call had ended with a stern Refusal, due to legal Restrictions on sending their Products abroad to treat Cancer.

The second Phone-Call, Half an Hour after the first One, forever changed my Way of looking at cancer Treatment and, on a wider Scale, Medicine in general.

The japanese Professor uttered a single Word, whose meaning was completely lost to Me: "itakialoe".

It took Me a few Days to realise that the Word wasn't the Name of a Drug, but of a Plant which grows in Japan: the *Kidakhi Aloe*.

I therefore decided to follow the Path suggested, and in just a few Days I had collected a significant amount of scientific Material on this Plant, thanks to the immense Assistance of several People working at "Area Science Park" in "Trebiciano", near Trieste (where I had presented in October 2000 my Project on Gadolinium 159 for Adro-Therapy under PET Guide, recently licensed).

The most extensive Studies on the Subject were not only Japanese, but also American, European and even Italian, especially from Veneto (Yakhak Hoeji, 1994, 38, pp: 311-321; Cancer Research, 2000, 60, pp: 2800-2804; Pharmacology, 1993, 47, suppl. 1, pp.: 110-119; Cancer Immun. Immunother., 1987, 25, pp.: 25-30; Plant. Med., 1989, 55, pp.: 509-512; J. Ethnopharm., 1988, 23, pp.: 61-71; Phytother. Research, 1993, Vol. 7, S14-S19; Phytother. Research, 1993, Vol. 7, S20-S22).

Pouring over the Material, especially Yoshimoto (Yoshimoto R., 1987), I was convinced firstly to substitute the Japanese monoclonal Antibodies with *Aloe*, since this Plant was also able to stimulate a full immune Response against Cells of Multiple Myeloma.

Immuno-Therapy was by far a better Choice than Chemo-Therapy, as proved by many Papers, like Professor Gianfranco Pizza's, who worked at "Sant'Orsola" Hospital of Bologna, where I immediately went in that horrible January of 2001.

Since 1986, He had been carrying out a Study on One Hundred and Twenty Italian Patients suffering from Metastasis caused by kidney Cancer and showed that, after Five Years, 20% (Twenty per cent) of the Patients was still alive, as opposed to the 2% (Two per cent) recorded with Chemo-Therapy (Pizza G., 2001).

However, it was studying the Works of the Researchers from Veneto that I came across the Concept of "Apoptosis", namely the Suicide of cancerous Cells due to a simple Vitamin, the *Emodin*, which can be found in the Plant of *Aloe* (Palù G., 2000).

It was completely disconnected from the immune Response, as the cancerous Cells were destroyed in a radically different Way and there was no need for monoclonal Antibodies, natural Antibodies, or white blood Cells of the same Patient to be activated against the Tumour.

The Word "Apoptosis" threw Me back to 1994, when I was attending my third Year of my specialization Degree in Nuclear Medicine at "Istituto Europeo di Oncologia", (I.E.O.), European Institute of Oncology.

It was a grey Day in suburban Milano, in via Ripamonti, and We residents had to attend to a specific Lecture where in all there were less than a dozen of Us, between Surgeons, Internist, Radiologists and "Nuclears".

The Lecture dealt with the potential Use of specific, extremely expensive Drugs, currently being studied by the worldwide scientific research Community, led by chemical and pharmaceutical multinational Corporations from "Big Pharma".

What deeply surprised Me, was that these potential Drugs, once injected into the patients' Blood or ingested as Pills, were meant to cause the spontaneous Suicide only of the malignant cancerous Cells, thus sparing the healthy Ones: a Discovery that I immediately perceived as revolutionary, because it was going to substitute both Chemo-Therapy and the new, ultra-modern radioactive monoclonal Antibodies, which were the Reason I was working hard to complete my long four-year specialization Degree in Nuclear Medicine in Milano.

These “magical Pills”, made up of supremely expensive, artificially synthesized Molecules, were finally going to reach Places where even the radioactive monoclonal Antibodies could not go, so eradicating Cancer and Leukaemia...

After the Phone-Call with Japan and my initial Understanding of the scientific Research at the University of Padova on the employment of *Emodin*, extracted from *Aloe*, which causes Apoptosis in malignant Tumours in Children (Palù, 2000), I was however struggling to remember any further Information about Apoptosis.

If had been more than Six Years since I had heard that strange Word in Milano.

I didn't have any other Source of Information on new, revolutionary Drugs based on this strange Phenomenon, but had They already been on Sale I would have known straight away, and I was determined to pay any Price and go to any Lengths, if that meant I was going to come into Possession of these revolutionary Drugs.

Unfortunately, the University of Padova told Me that *Emodin*, extracted from *Aloe*, wasn't yet available for intravenous Use in human Beings.

I therefore started browsing the INTERNET, sieving through anything and everything that could be related to “Cancer” and “Apoptosis” ...

I was to be shocked: there were Hundreds of natural Vitamins that induced cancer Apoptosis and which were not only cheap, but easily retrievable in Food, as They were usually found in Fruit and Vegetables.

The Papers, almost all of them available in PDF Format, can be found in the scientific Literature and indicate the amounts of Vitamins which are needed to induce Apoptosis in the cancerous cell Line considered.

The amounts are measurable in microMoles (i.e. micromoles/litre, i.e. nanomoles/millilitre, i.e picomoles/microlitre).

See Bibliography 17-128 of my Book “*Cancer Therapy, 23 clinical Cases of malignant Tumours cured without Chemo-Therapy*”, Editoriale Programma, Treviso.

The Studies generally demonstrate that these Plants almost never have side Effects on healthy Cells.

The Concentration of this Vitamins soared if season Vegetables and Fruit were land grown following good “organic Farming” Practices.

The apoptosis Mechanism, or cellular Suicide, isn't the same for every Cell, but it varies, depending on the Vitamin that causes it, resulting in many Possibilities for primary, secondary and tertiary Activation.

The neoplastic Cell cannot oppose this Process, since it is not able to resist all these vitamin-induced biochemical Activations.

Therefore, it issues the final Order of Suicide which, once in Motion, cannot be revoked, not even by the same neoplastic Cell.

By Apoptosis We mean the activation of specific Endonuclease which break up DNA, acting at the Level of the nucleosomic Sites which make up the primary structural Unit of the nuclear Chromatin of the Cell.

The induction Molecules, induce Apoptosis in neoplastic Cells, by activating proteolytic intracellular Enzymes, which cause the Deterioration by Proteolysis of the vital Sequence of the DNA, thus causing the Death of the Cell through Apoptosis.

The Sequence of the biochemical Events occurring in Apoptosis is well known and documented in the scientific Literature for Hundreds of Vitamins (See Bibliography 17-128 of my Book “*Cancer Therapy, 23 clinical Cases of malignant Tumours cured without Chemo-Therapy*”, Editoriale Programma, Treviso).

A significant Consumption of ATP (biochemical Energy) distinctly differentiates the Process of Apoptosis from Necrosis.

During Apoptosis the Cell does not spill out any of its Contents, so that no inflammation Processes are involved.

This is a very important Trait distinguishing *Apoptosis* from *Necrosis*.

Necrosis is characteristic of the “burning” Effect on Tumours by Radio-Therapy, by Radio-Immune-Therapy carried out by radioactive monoclonal Antibodies with Yttrium-90, by the renowned Chemo-Therapy, as well as by Immune-Therapy mediated by white blood Cells or natural Antibodies.

In the Apoptosis, the compact Granules of the fragmented DNA (small Parts of internucleosomal DNA) are moved to the outer Regions of the dying Cell, so that a distinctive Half-moon shape is formed.

These Fragments are subsequently engulfed by the cell's Membrane and evaginated, which gives the Cell a bubble-like Look (the Process is known as "blebbing").

These Blebs Part from the dying Cell and produce apoptotic Bodies that are rich in transglutaminase Proteins and are phagocytised by Macrophages (White Cells) and other Cells nearby. The same Cell, now dying, displays Traces of Phosphatidylserine on its Surface: these Molecules mark the Cell for phagocytosis by Macrophages.

The Reason why Apoptosis starts in cancerous Cells, rather than in healthy Ones, can be connected to the characteristic that the DNA (Deoxyribo-Nucleic Acid) is damaged or ruptured, in chromosome, chromatid or sub-chromatid Aberration, and is present in all the neoplastic Cells, and therefore, it's the specific Characteristic of the malignant neoplastic Cell, which sets it a Part from other Diseases.

The DNA Strand, whose structure has been severely compromised, issues its Suicide's Order due to the Presence of common Vitamins which, as the Laws of Nature dictate, tend to Act as actual "Keys of Life" and manage the complex biochemical Relations that guide the correct Functioning of each Cell in the best Way possible, in its Form and Stage of Development.

Curiously enough, Apoptosis can also be recorded in Instances of chromosome Aberrations which are not connected to Cancer or Leukaemia, as can happen in Miscarriages, which occur in around 9% (Nine per cent) of all Attempts at Pregnancy (UNSCEAR, 1988, United Nations Scientific Committee on the Effects of Atomic Radiation).

Coming back to "Apoptosis" of cancerous and leukemic Cells, the most astonishing thing I found was that the scientific Research had been freely published in medical Journals, but Nobody had ever mentioned it during the long Years of my Degree in Medicine, or in postgraduate Courses, except perhaps superficially and, like in Milano in 1994, always connecting "Apoptosis" to a Patent for future commercial Exploitation.

In truth, synthesized Drugs connected to this strange Phenomenon of Suicide of cancerous Cells already existed back in the 1950s, since Doctor Fishman had already proven, in 1947, the peculiar Mechanism that could induce Suicide in Cancer, forcing the affected Cell to turn a simple Vitamin, the *B17*, into Cyanide and Benzaldehyde within its internal Cytoplasm (Fishman W., 1947).

The above had paved the Way for Tasca's 1958 Study on Twenty-one clinical Cases, where He described the Consequences on cancer Cells of a simple intramuscular Injection of barely One Tenth of a Gram of *B17-Laetrile* (Tasca M., 1958), as well as Morrone's renowned Study of 1962 on Ten american clinical Cases, where He also described the slow, progressive and spontaneous Regression of complete breast neoplastic Masses, with no need to resort to supportive Surgery or Radio-Therapy: malignant tumorous Masses whose initial Weight could reach over a One Kilo which had literally melted away after about a One Year of intravenous Infusion of roughly One Gram a Day of *B17-Laetrile* (Morrone J., 1962).

Finally We reach the One Hundred and Fifty clinical Cases studied by Guidetti, Rossi and Deckers, the Results of which were presented at the Ninth International Cancer Congress in Tokyo in 1966 (Guidetti E., Rossi B., Deckers C., 1966), with good Results in Half the Cases.

All these Treatments required the Use of a pretty cheap synthetic Molecule, called "Laetrile", derived from the well-known B17 Vitamin, present in many Plants, many of which are used as Food, and which is easily recognizable by its sour Taste, ascertainable especially when chewing the Seeds of many Fruits.

Subsequently, in 1979, *Laetrile* was prohibited from Supreme Court of United States (No. 78-605, Argued April 25, 1979. Decided June 18, 1979. 442 US 544). Later, the B17-derived Molecule was not be marketed even too in Europe.

And yet, it's derived from the common natural Vitamin *B17*, which the great russian Doctor Inosemtzeff had already used in the Middle XIX Century on Two clinical Cases of Cancer, with good Results (Inosemtzeff T., 1845).

It's produced when the Plant is attacked by Fungi, since it has the Characteristic of being able to divide itself in Cyanide and Benzaldehyde (both toxic) if Oxygen is absent and there is acidic Tissue, which is typical of Fungi.

Curiously, human neoplastic Masses also show very low Levels of Oxygen and a high Concentration of Acidity, due to the very Nature of the malignant neoplastic Aggregation where the sick Cells, whose DNA is ruptured or severely damaged (chromosome Aberrations), are not able to regularly carry out their standard Metabolism and, in particular, tend to replicate One on top of the other, reaching a cellular Density almost Ten Times the One in any normal human Tissue, rising from almost 200-300 Millions of live Cells which can be found in One cubic Centimetre of human parenchymal Tissue to almost 3-4 Billion (3.000-4.000 Millions) of malignant neoplastic Cells which can be found in One cubic Centimetre of human Cancer.

This strange Ability of some Plants to produce Cyanide to defend themselves but also, for some obscure Reason, to cure Cancer, was already well known in ancient Times.

Aulus Cornelius Celsus, in his famous Book “De Re Medica” (“On the medical Things”), of the First Century After Christ, was the first Scholar to assert that benign Tumours were enclosed by a Capsule that enveloped them, thus distinguishing them from malignant Tumours.

Relating to Cancer, He also described different Kinds of Tumours, among which gal bladder Cancer, liver Cancer, mouth Cancer and breast Cancer.

Referring to breast Cancer, He was the first Scholar to highlight how the axillary Lymph Nodes were affected by Metastasis and proposed the interesting Observation that breast Cancer was to be excised only if it was in its early Stages, while any Cancer in an advanced Stage was not to be treated with Surgery, but with other Methods:

“...Some have caused caustic Medicaments, some the Cautery, some Excision with a Scalpel; but no Medicament has ever given relief; the Parts cauterized are excited immediately to an Increase until They cause Death (...*occiderent*...). After Excision, even when a Scar (...*cicatricem*...) has formed, none the less the Disease has returned, and caused Death (...*causam mortis*...); while at the same Time the majority of Patients, though no violent Measures are applied in the Attempt to remove the Tumour, but only mild Applications in order to soothe it, attain to a Ripe old Age, in Spite of it...”

“...QUIDAM USI SUNT MEDICAMENTIS ADURENTIBUS, QUIDAM FERRO ADUSSERUNT, QUIDAM SCALPELLO EXCIDERUNT: NEQUE ULLA UNQUAM MEDICINA PROFECIT, SED ADUSTA PROTINUS CONCITATA SUNT ET INCREVERUNT, DONEC OCCIDERENT. EXCISA, ETIAM POST INDUCTAM CICATRICEM, TAMEN REVERTERUNT ET CAUSAM MORTIS ADTULERUNT; CUM INTERIM PLERIQUE NULLAM VIM ADHIBENDO, QUA TOLLERE ID MALUM TEMPTENT, SED IMPONENDO TANTUM LENIA MEDICINA, QUAE QUASI BLANDIANTUR, QUOMINUS AD ULTIMAM SENECTUTEM PERVENIANT, NON PROHIBENTUR...”

After all, even in those Times all roman Doctors were aware of the famous Statement from Hippocrates of Kos, founder of Western Medicine, relating to cancer Treatments: “...*Cancer is not cured with surgical Instruments, but with a vegetarian Diet and medicinal Herbs...*”

As well as another Motto of the great greek Doctor:

“...Let Medicine be your Food, and Food be your Medicine...”

In particular, roman Doctors used the “Ceratum ex Rosa”, i.e. briar rose Oil, which, as We know, is especially rich in *B17*.

As far as the Greeks are concerned, Dioscoride in his first Book (1, 39), explained how to prepare an Oil of sour Almonds (in ancient Greek: “Elaion Amygdalinon”), which used to be perhaps the most effective galenic Formulation in treating Cancer, since it was extremely rich in *B17*.

The Book was also taken up by Virgilio Marcellino. This latin Text is available in the my Book: “*Cancer Therapy, 23 clinical Cases of malignant Tumours cured without Chemo-Therapy*”, published by Editoriale Programma of Treviso.

The efficacy of this Preparation is also easy to deduce because Vitamin *B17* has the unfortunate serious side Effect of releasing free Cyanide in the Presence of Acidity, for example in the gastric Cavity, a Phenomenon that can be easily proven by throwing bitter Almonds in a Cauldron of boiling Water: the characteristic smell of Cyanide, that of “bitter Almonds”, is immediately detectable.

It’s a bit Suspicious, then, that bitter Almonds were already commonly used, albeit as Oil, in the late roman Empire.

Indeed, the Oil mixes with difficulty with gastric Juices, and thus protects the precious *B17* Vitamin from the stomach Acidity and allows it to reach the Intestine, where it is absorbed by the intestinal Villus, transferred to the Liver through the portal Vein, flows through the Blood and is finally accumulated, still as an innocuous *B17* Vitamin, in the neoplastic Mass of the ancient roman Patient.

A second Clue is an intriguing short Fragment in Latin which can be found in an ancient amanuensis Code (all Text in Latin), known as “*Regimen na Sláinte (Regimen Sanitatis Magnini Mediolanensis)*”, by Séamus Ó Ceithearnaigh, nowadays kept in Ireland, at the University College of Cork, and brought to my attention by a kind Lady from Dublin.

The short Fragment reads as follows: “*Lac Amygdalorum frigidum cum Mica panis loti*”, where the bread Crumbs (*Mica panis*), in my humble Opinion, could have been used to staunch the Patient’s gastric Jouce, thus preventing the “fresh Almond’s Milk” (bitter Almonds ?) from being immediately turned into Cyanide within the abdominal Cavity...

Therapeutic Dosage of Vitamin B17

The various kinds of Seeds contain adequate quantities of Vitamin B17.

But, unfortunately, it is not possible to calculate the bioavailability of these Seeds for absorption of Vitamin *B17* by intestinal Walls, and this depends on many Factors.

Empirically, in adult Patients weighing about 70 Kg, it can be lethal to administrate daily 15 (Fifteen) bitter almond Seeds (in 24 Hours), or 30 (Thirty) bitter peach Seeds (in 24 Hours), or 300 (Three Hundred) bitter apricot Seeds (in 24 Hours).

On the contrary, even a quantity as small as 2-3 bitter almond Seeds is deadly for a Child.

Important Note: *B17-Laetrile* is dangerous and prohibited in Patient under Chemo-Therapy and/or after Chemo-Therapy (Failure of Liver's Detoxifying from Cyanide).

B17-Cyanide poisoning: medical Aspects (Garetto G.)

1) Effect: quick tissue Anoxia due to intracellular respiratory Failure and toxic Lesion of respiratory Centres.

2) Cyanide, plasmatic Half-Life: about 80 Minutes.

3) Clinical symptoms: Asthenia, Torpor, Somnolence, Headache, Vertigo, Coma, Dyspnea, Apnea, Polypnea, heart rhythm Disorders (Bradycardia, atrial Fibrillation). Vomit and Diarrhea are possible as well.

High abdominal Pain.

Not associated with cyanotic Coloration.

Basic therapy of Cyanide-Detoxifying (Garetto G.)

1) Artificial breathing with 100% Oxygen.

2) Hypotension needs to be treated with Sympathomimetic Amines (if it's of cardiogenic Origin) or with liquid Infusion (if it's of hypovolemic Origin).

3) Electrolytes and acid-base Balance have to be checked (risk for Lactic Acidosis).

Antidotal Therapy of Cyanide-Detoxifying (Garetto G.)

- 1) Inhalation of gauze Pads soaked with a Vial of Amile Nitrate for 15-30 Seconds, to be repeated every 2-3 Minutes using another Vial.
- 2) Slow endovenous Infusion (3-5 Minutes) of 10 millilitres of 3% Sodium Nitrite Solution.
- 3) Endovenous Infusion of 50 millilitres of 25% Sodium Thiosulfate.

Clinical observation must be intense for at least 24 Hours.

Medical Treatment should be corrected according to monitoring of Methaemoglobin, it should not be more than 40% (Forty per cent).

Leaving aside the World of Greeks and Romans, and paying closer Attention to the extensive Documentation of scientific Work produced over the past Thirty Years on the properties Vitamins need to induce Apoptosis in human cancerous Cells, One can note that different Quantities of Vitamins are needed in the first 48 Hours to induce Suicide in a significant Quota of cancerous Cells, namely at least Half of the analysed sample of cancerous or leukemic Cells: both are characteristic of the Effect caused by Vitamins and therefore identified by the international Measure “IC 50%”.

It can be stated that, in all Cases written about in medical Literature, there are no Effects induced by Apoptosis when the quantity of Vitamins is lower than some nano-moles per millilitre of the analysed Sample, in which the neoplastic Cells come into Contact with fresh Vitamins extracted by recently-harvested medicinal Plants.

I believed then that such Concentration, compared to the Vitamins which can be found in a millilitre of Blood, was going to allow Me to Study the final Concentration of these Vitamins in the different Organs of the Patient, and especially on Cancer and its Metastasis.

But I needed to find some valid scientific Work, where the Vitamin, made radioactive, could be accurately measured in different animal Organs, such as Rats, Rabbits, or Guinea Pigs, which were going to be killed and dissected shortly after They had ingested the radioactive Vitamin.

The Level of radioactive Vitamin measured in the Plasma, or in the Blood, of the dead Animal was to be the “nominal” Reference’s Value for all the following comparisons Values of radioactive Concentration of the same Vitamin in the Organs and Tissues of the same Animal, Hours and Days after its Death and, hopefully, was going to reveal the Trend in Time of the Concentration of the same Vitamin in neoplastic Tissues, if present in the Animal.

It was just a Matter of finding such a Study.

I couldn’t find anything related to Animals with Cancer, but I was able to retrieve some Research carried out using the famous *Emodin*, made radioactive and used to feed Rats. The *Emodin* is a Vitamin contained in the Plant of *Aloe*.

The Study had been carried out by german Researchers, in Koln (Cologne), eight Years earlier, and it immediately caught my Attention: it was the experimental Model I was hoping to examine.

The Pharmaco-kinetics of *Emodin*, extracted from the *Aloe* and made radioactive through atoms of Carbon 14, turned out to be the following (SEE Table 1, W. Lang):

Table 1: Concentration of Aloe *Emodin* (nanograms equivalents/gram wet Weight) in various Organs and Tissues of male Rats at different Times after oral Administration of 4.5 mg/kg = 5.6 MBq/kg ^{14}C -Aloe *Emodin*, means of 3 Rats (n.m.: *not measured*).

Organs	Nanograms equivalents / gram					
	3 Hours	6 Hours	12 Hours	24 Hours	48 Hours	96 Hours
Blood	164,7	131,1	41,2	15,4	15,5	10
Plasma	312	300,4	78	32,1	28,6	13,7

Bone	26,3	37,3	12	n.m.	n.m.	n.m.

This Table 1 is available from: Werner Lang, *Pharmacokinetic-Metabolic Studies with ¹⁴C-Aloe Emodin after oral Administration to male and female Rats*, Pharmacology, 47, suppl. 1, pp. 110-119, 1993, Table 2

Comparing the Concentration of *Emodin* in the Blood or Plasma to the One recorded in the Liver, Lungs, Kidneys, Stomach, intestine Walls and Colon-Rectum, it was possible to record extremely high Values of Vitamin's Uptake in specific Organs, unfortunately for no longer than 4-5 Days, but which allow us to consider *Aloe* as a potential Plant to treat Cancer in the Stomach, small Intestine, Colon-Rectum and Kidneys.

It's also interesting that there is a fundamentally ubiquitous Distribution in the rest of the Tissues and Organs, Bone Marrow included, although a lower Uptake is registered.

Amounts of Vitamins needed to induce Apoptosis in a certain Number of tumour Cells in the laboratory without damaging healthy human Cells are really very small.

Amounts needed are measurable in a few dozens of micromoles/litres, i.e. nanomoles/millilitres, i.e picomoles/microlitres (See Bibliography 17-128 by my Book "*Cancer Therapy, 23 clinical Cases of malignant Tumours cured without Chemo-Therapy*", from Editoriale Programma, Treviso).

On this Matter, I have been familiar with Tatman's scientific Paper since 2002.

He listed around One Hundred and Eighty different Types of Vitamins belonging to the vitamin Subclass of Isoprenoids, among which I could find *Limonene*, *Menthol*, *Elemene*, *Eugenol*, *Farnesol* and *Ocimene*, which had been used in Experiments in rat melanoma Cells and in human leukaemia Cells (Tatman D., 2002).

Specifically, lethal Effects were reached in 50% (Fifty per cent) of the neoplastic Cells after just Forty-eight Hours of aqueous Suspension of these malignant Cells with just 28 nano-moles per millilitre of *Farnesol*, a Value which increased when related to *Thimol*, where at least 120 nano-moles per millilitre of aqueous Suspension were needed, to *Menthol*, where the Threshold was 250 nano-moles per millilitre, unaltered for at least 48 Hours, and even 450 nano-moles per millilitre of *Limonene*, if kept in Contact with these Cells for at least Forty-eight Hours.

Many other Studies, around a Hundred, extrapolated by official medical and scientific Literature, and quoted in my other Publication (SEE sixt Chapter of the my italian Book “*Diventa Medico di Te Stesso*”, by Editoriale Programma from Treviso), also indicated similar Values of Vitamins needed to induce Apoptosis in the different Types of neoplastic Cells taken into Consideration: Quantities which were almost always reported in “Mmoles” and therefore equivalent to: micro-moles/litre, namely nano-moles/millilitre, namely pico-moles/microlitre. The Papers usually proved that these Plants didn’t have any negative side Effects on healthy Cells.

I also noticed Two other Facts: the same Vitamin could be very effective against different Types of Cancer: for exemple, *Limonene*, which can be found in Lemons.

Howerver, it’s basically useless on melanoma cell Lines, where the threshold is over 450 nano-moles per millilitre, left unaltered for at least 48 Hours, according to Tatman’s Work.

The second Note was connected to the different Percentage in the Uptake of Vitamins in the various Organs ant Tissues of the Lab Animals, as proven in the Study carried out in 1993 by german Reseachers with *Emodin* taken from Plant of *Aloe*, made radioactive with Carbon 14, and fed to Rats (SEE Table 1, from W. Lang, 1993).

I therefore started a long research Study, cataloguing the different anti-cancer Vitamins, and indicating for each the following:

- 1) Fruits, Vegetables and medicinal Plants where it could be found.
- 2) Percentage of the Vitamin in the Vegetable in different Periods of the Year, not only when the Fruit or Vegetable was ripe.
- 3) Application of the pharmaco-kinetic Model discovered by german Researchers in 1993, where *Emodin* tken from *Aloe*, made radioactive, and used on Rats. Vitamins are considered similar to each other during the gastro-intestinal Absorption, with subsequent Accumulation in the Liver and Effusion into the blood Flow.
- 4) Differential Study on the Distribution of each Vitamin in the human Body, based on its own, unique biochemical Characteristics, with the Aim of calculating the uptake Percentage which would have been achieved on tumours Masses with *High Interstitial Fluid Pressure*, or “H-IFP” (Jain R.K, 1988). The latter “H-IFP” is a fundamental Characteristic of any malignant Cancer even slightly bigger than Half a cubic Centimetre (Weight 2 Grams), and is the second Reason why the Treatment with radioactive monoclonal Antibodies charged with Yttrium-90 failed to Work, as the Antibodies weren’t able to pierce the external Wall of the tumours Mass, due to their Weight (150,000 Dalton) and because of the very *High Interstitial Fluid Pressure* (High-IFP), present in the whole cancerous Mass, external Margin included.

5) For each Vitamin, a clear Definition of its Ability to induce Apoptosis in 50% of neoplastic Masses in less than 48 Hours for each Type of known Cancer, trying to follow the immense Amount of scientific Data already available, though scattered through Thousands of scientific Papers unrelated to each other. I noticed the extremely interesting Study of Palù in 2000, where He identified full Efficacy of *Emodin* already at just 1 (One) single nano-mole/millilitre in Neuroblastoma in Children, while the Value increased by 13 (Thirteen) with Reference to the Ewing's Sarcoma (Palù, 2000).

On my Side, I could count on empirical Evidence indicating that, in a human Being, large Amounts of fresh Fruit and seasonal Vegetables, mixed with low Protein and Vitamin B12 as Diet, lead to healing from metastasized Cancer in 30% (Thirty per cent) to around 40-50% (Fourty-Fifty per cent) of Patients, after 5 (Five) Years from Diagnosis, based on the 153 melanoma Patients reported in Hildebrand's Study of 1995 (Hildebrand G.L., 1995), the 288 Patients of Binzel's Study, Half of which metastasized and many of which had been followed up on until 18 Years after the cancer Diagnosis and its Treatment (Binzel E.P., Library of Congress Catalog Card Number 94-079593), and finally the Contreras Study (Contreras F. and Kennedy D.E.).

Ideally, a simple intravenous Injection of the single Vitamin in the Patient's Blood would be preferable, thus achieving an extremely high Percentage of Uptake of the Vitamin by the Tumour, like Morrone did in 1962 with *B17-Laetrile*, via intravenous Injection.

Intra-arterial Injection could also be used, just like the chinese Study did in 2000 with a simple *Elemene* Vitamin, extracted from Turmeric and injected into the carotid Artery of Forty Patients, 29 of whom were suffering from Glioma (a brain Tumour originating in the glial Cells), and 11 with Metastasis to the Brain from Cancers originating in other Organs: the Result was that, after 4 (Four) Years, 30 (Thirty) Patients saw a Reduction of over 60% (Sixty per cent) of the initial tumorous Mass of the Glioma or the cerebral Metastasis (Tan P., 2000).

An english Summary (Abstract) of this chinese Study can be read in my Book: *Cancer Therapy, 23 clinical Cases of malignant Tumours cured without Chemo-Therapy*, by Editoriale Programma from Treviso.

The Idea of injecting together, at least intravenously, the *B17-Laetrile*, *Emodin* and *Elemene* had fascinated Me, since I was familiar with this methodological Approach after the Five-year training Course at "San Raffaele" Hospital in Milano, as a Resident in Nuclear Medicine, and I was therefore resolved to do it, even if I had to go to the nearest Chemist, or the nearest medical supplies Shop, and buy the drip-Feeds and catheter Needles myself.

But when I started the treatment Protocol, in May 2002, so I could begin treating Patients using this new Approach, the Vials for intravenous Infusion, with the above mentioned Vitamins, were not available to purchase.

I had to make do with what I had: I was going to administer the anti-cancer Vitamins using only tasty Dishes of Fruit and Vegetables, heavily spiced and accompanied by freshly cut leaves of medicinal Plants like *Aloe*...

But I still didn't know how much Fruit and Vegetable my Patients needed to eat per Day, while following a low Protein and Vitamin B12 as Diet.

I therefore had to research Vitamin's Assimilation by the gastro-intestinal Tract, how They were going to be absorbed by the Liver and what their final Percentage in the Blood was going to be.

This last Question was the final One of my Study, because german Research in Koln (Cologne) in 1993, allowed Me to consider a fundamentally ubiquitous Distribution of Vitamins in the other Organs and Tissues; their low molecular Weight was the key Factor that allowed them to overcome the "Barrier" of the *High Interstitial Fluid Pressure*, or "H-IFP" (Jain R.K, 1988), typical of malignant Tumours, which had caused the Treatment of monoclonal Antibodies to fail, since They weigh over 150,000 Dalton (*Emodin*, for example, weighs just a few Hundred Dalton, like all other Vitamins), and were therefore unable to permeate deeply the killer neoplastic Mass...

Basically, I needed to understand, for a specific Patient suffering from a specific Cancer, how much Fruit, Vegetables and fresh medicinal Plants, and of which kind, I needed to use each Day to reach a Level of some Dozens of nano-moles/millilitre of Vitamins "X", of Vitamins "Y", and perhaps even Vitamin "Z" in the Blood, and how to keep that stable Levels over Time.

High Levels of natural anti-oxidants Such as Carotenoids, Tocopherols and Ascorbic Acid have been studied, to test eventual positive Changes in the pathologic Progress of serious Illnesses such as Cancer.

In an Experiment (Leeds A.R., 1999) which integrated commercial Extracts of Fruit and Vegetables into the Diet of 16 Adults, showed the following Values of plasmatic Concentration after the seventh Day of Therapy:

- 1) Beta-Carotene: increased to stable hematic Concentrations of 0.5 microMols/liter (i.e. 0.5 nano-moles/milliliter).
- 2) Vitamin C (Ascorbic Acid): increased to about 3 Times as much, reaching stable hematic Concentrations of 60 microMols/liter (i.e. 60 nano-moles/millilitre).
- 3) Vitamin E: increased up to stable hematic Concentrations of 3 microMols/liter (i.e. 3 nanomoles/milliliter).

In another Experiment (Abbey M., 1993), which integrated commercial Extracts of Fruit and Vegetables into the Diet, after 3 Months of supplementing the Diet with 18 milligrams a Day of Beta-Carotene, 900 milligrams of Vitamin C and 200 milligrams of Alpha-Tocopherol, the plasmatic Concentrations increased respectively by:

Beta-Carotene: + 500%; Vitamin C (Ascorbic Acid): + 55%;

Alpha-Tocopherol: + 27%

Other Papers confirming the data were published by Inserra, who studied 46 Patients (Inserra P.F., 1999), and Smith, who studied 20 Patients (Smith J., 1999). Main Vitamins that One would have wanted to Study *in vivo*, in the Thirty clinical Cases on which this Paper was founded:

Ascorbic Acid (Vitamin C) in Leukocytes: 30 micrograms/10E+8 Leukocytes.

Plasma Retinol (acceptable Value): 15-60 microgram /100 millilitres of Blood.

Plasma Carotene (acceptable Value): 80-400 micrograms/100 millilitres of Blood.

Plasma Cholecalciferol (Vitamin D3): 10-80 nanograms/millilitre of Blood.

Tocopherol (Vitamin E): at least 700 micrograms/100 millilitres of Blood.

Actually, Vitamins in the human Body could reach much higher Values, but it would have meant that the Patients needed to eat up to 5-6 Kilos of Fruit a Day...

The Solution, quite simple, really, was to think of a Way to transform all those Fruits, Vegetables and fresh medicinal Plants into a dense Drink, which the Patient could imbibe at the highest Concentration possible but without raising their glycaemic Level too much, and perhaps using a Fruit-Press able to preserve and concentrate the highest Amount of Vitamins present in these Kinds of Food.

My Aim was to reach stable Levels of at least 30-50 nano-moles/millilitre of Blood of those “X”, “Y”, and “Z” Vitamins.

Unfortunately, there was no hospital Lab or private Lab available to analyse the Concentration of these “X”, “Y”, and “Z” Vitamins, which was different depending on the Kind of Cancer affecting the Patient: in Nine Years of home Therapy I had never been able to measure *Emodin*, or *One* of the 180 (One Hundred and Eighty) Vitamins (*Isoprenoids*) listed by Tatman, nor *One* of the 600 (Six Hundred) Vitamins known as “Carotenoids”, or *One* of the over 5.000 (Five Thousand) Vitamins known as “Bioflavonoids”...

The only possible Lead I could follow was that of the great german Doctor Max Gerson, who had developed a specific Fruit-Press which could concentrate the Vitamins in the Fruit and Vegetables to 50 (Fifty) Times the standard Amount, and whose precious Work I decided to study (Gerson M., 1945, Gerson M., 1949; Gerson M, 1978).

However, this “metabolic” Therapy based on massive Use of natural Vitamins contained in Fruit, Vegetables and medicinal fresh Plants, required that the Food be of good Quality.

Unfortunately, it’s a well-known Fact that the Pesticides used to protect the Plants from Parasites and Fungi, inhibit the Plant from producing the Vitamins it would need for this Purpose, thus causing it to be basically without them.

This would result in the Farmer saving all of their Crops, but at the Cost of selling Food poor in Vitamins and rich in toxic Pesticides, and whose taste doesn’t even come close to that “Essence” fabled by our Eiders, who reminisce about a Time where Fruit was “real” Fruit and Vegetables were “real” Vegetables...

Besides that, extensive Use of chemical Fertilizers has significantly impoverished the Terrain, thus making it almost impossible for Plants to retrieve extremely important Minerals like Silicon and Selenium, which are fundamental for healthy Growth and for Immunity from Parasites or other Attacks, as They are able to produce their own Vitamins once They have processed the primary Minerals in the Earth.

It was then a Question of introducing the Patient to a low protein Diet, i.e. in the Nine essential AminoAcids which collate together to form Proteins and which are then used by Cells, both healthy and neoplastic Ones, to build new Cells, and to look at other Factors which also favour the Creation of new Cells of Cancer, like for example Vitamin B12, necessary for the Synthesis of new DNA...

A further, not insignificant Matter, was the Danger of introducing the so-called GMO Plants (Genetically Modified Organisms) into the food Chain.

Since their DNA is structurally modified, it could no longer be guaranteed that the tertiary Structure of their Vitamins was going to allow these wonderful “Key of Life” to keep functioning, exactly like a Key that has been modified and then used normally to open and close Doors, as if being changed didn’t affect its Functionality, once inserted into the Lock (DNA) ...

For many Scientists the Vitamins contained in GM plants are basically suspected to produce as yet unknown Effects on the elaborate vegetable, animal and human Biochemistry: their tertiary Structure might prove modified compared to natural Vitamins, and GM pseudo-Vitamins might therefore be unable to correctly interact with the complex biochemical Reactions that occur in Cells and lie at the Heart of Life.

Pseudo-vitamins are suspected to be of concern for Man – although that has not been proved yet – in the Paper describing the analyses carried out in Italy by a research Group at the *National Research Institute for Food and Nutrition* under the high Guidance of Doctoress Elena Mengheri, MON 810 Maize formed the Object of proteomic Analysis, the Results of which have shown that the Regulation of no less than 43 (Forty-three) Proteins was altered compared to conventional Maize, and that They contained a new Version of the important gamma-zein Protein, which is contained in Maize (Finamore A., 2008).

Currently, only the Spectrometry in Magnetic Resonance Scans is able to study the Molecule’s tertiary Structure, but it would take several Milligrams of Material to test and duly analyse it.

It would then take further Time to completely clean the Machine, even after a single Use, and the Cost would increase exponentially....

On the Genetically Modified Organisms (GMOs), SEE also The “SANA Conference” in Bologna, 13th September 2008, with my Report (ENGLISH, ITALIANO, ESPANOL, DEUTSCH) on “*The Threat of Genetically Modified Organisms*”, in Eight Points.

This my Report, in ENGLISH, ITALIANO, ESPANOL and DEUTSCH, is available from INTERNET, in free E-BOOK “*Mille Piante per guarire dal Cancro senza Chemio*”, Dicembre 2010, or Febbraio 2011.

My precedent Report of 2006-2007, in FRANCAIS, on the Threat of GMO (“*La Menace des Organismes Genetiquement Modifies*”), was available in “*Mille Piante per guarire dal Cancro senza Chemio*”, Gennaio 2007, but is today NO MORE AVAILABLE. This is again available ONLY from a Site INTERNET in France, of 2007: “*REFERENDUM d’initiative populaire dans tous les pays de l’Union Europeenne pour mettre au ban les cultures OGM*” (55 Pages).

Fourth Chapter: 21th April 2002

At the End of January 2001, the Approach to treatment had been established, although I had to grapple with the practical Impossibility of procuring *B17-Laetrile*, the *Emodin* and the *Elemene* to inject intravenously into my Mother.

It was the beginning of 15 very long Months that started in February 2001 and ended in April 2002, long Months of Suffering and Pain, and of Chemo-Therapy.

Then the grim Night of 21th April 2002 came, and I had to come to terms with the Idea that We cannot escape Fate.

Anyway, I took my Decision, which was final.

I knew very well I was going to have everybody against Me.

The future Opposition made an in-extremis Attempt to meet informally, before the Events took Us beyond any Qualms...

I refused.

Another Nine long Years passed, and another Night arrived, 30th April 2011...

Fifth Chapter: Nine Years of Therapy

I looked at the Clock: it was 23.55.

It was the last Time that my Patients could still call at my phone Number: the old 040-350674, to ask Me something, a final Piece of Advice, a final Call for Help...

I turned the old Dosimeter on, to check how much the Measurement of external Radioactivity had increased on the Display.

I put it delicately the window Pane and waited.

Slowly, the tired Heart of the canadian PDA-2 went back to measuring the *gamma* Radiations from Caesium 137 filtering through the flimsy glass Barrier of the Window, with their lethal 662 KeV of photon Energy...

Midnight of 30th April 2011 had struck...

I got up and went to the Phone I kept in my living Room.

I picked up the Receiver and placed it beside the Lamp, away from the Dial.

I went back to check on the Dosimeter: the Measurement on the Display were still going up, while the little frenzied Numbers kept changing on the small Gauge, until their race to the Top started slowing down...

Indeed, the Rain was less Intense and wasn't pounding any more against the wet Panes of the kitchen Windows.

It was then that I noticed that the small red Light at the bottom left Corner of the Device was less bright than before: the Battery was running out.

I kept silently watching the PDA-2, dimming Light, tired and unstable against the window Panes, while my Thoughts turned almost accidentally to the Events of the previous Years.

My mind went back to the many Feelings sparked by a vagabond, peripatetic Life, which had now come to an End, and had started on that Day, many Years ago in Piola, with a Mouse running around in a small Cage, and ended there, that Night, in front of a Window, in an old Kitchen, waiting for the Sun to rise again on the City, drying up the radioactive Rain that was going to fall until Dawn.

I thought back to the Champs-Elysees, to the big Hospitals in Paris and Lyons I had visited in 2001, like a little, provincial Italian, asking for Help for my Mother...

And, by comparison, I thought of June 2003, of those Americans who had left the Depths of Louisiana to undergo that long, wearying Journey to Trieste, their Bones aching from Cancer... Three Years later, when the Health of their loved One had kept getting better, thanks to the *Aloe's* Plantations, They had with great Difficulty put in their large Farm, They sent Me a long Letter, which ended with the following Sentence: "...*The best of Live is to give and to understand: thanks, now the STATES are no longer Alone...*"

I also thought back to 2002, to the small russian Party, with that simple wooden Plate They had brought Me back as a Gift from Omsk or from Novosibirsk, its Base carved with the Date 16.09.02, my Name and the City of Trieste, all written in Cyrillic.

Their strange Composure, bordering on Formality, sitting beside the only Person among them who knew how to speak Italian.

After a long Phone-Call in Russian, duly taking Note of a Series of Matters suggested by Moscow from the other Side of the World, He returned to the Issue of the Nine essential AminoAcids, namely *Leucine, Valine, Isoleucine, Lysine, Methionine, Tryptophan, Threnine, Phenylalanine* and *Histidine* which I had reported, studied and analysed from a new Perspective on my Website INTERNET "Le Cure Naturali".

A Question I felt I had to answer, only in Relation to what I believed was true, based on my scarce Notions of Biochemistry.

A Matter on which the Russians, in the End, totally agreed, stating that "...*Sì, senza proteine il Cancro non può crescere...*" ("...*Yes, without Proteins the Cancer can't grow...*").

And then, after those Four Months They spent in Trieste, I recalled their second official Visit, when the russian Patient had seemingly been cured of the neoplastic Mass, of 5 (Five) Centimetres, He had in his Throat, between his Neck and his left Ear, which had become a pultaceous residual Mass and had been expelled in 3 (Three) Days from his left Ear, while the Eardrum self-ruptured...

The long, incredible Dinner They offered, on the Day before Christmas Eve 2002, in an Apartment in via Conti, in Trieste, in a House inhabited almost exclusively by serbian Families, whose Heads of the Family were extremely respectful towards the elderly and influential "Ivan", who spoke to Me in stilted Italian.

The Two russian Women, busy in the Kitchen, but proud of what They were doing for Me that Night in the small Kitchen We Five were sitting in.

We were also joined by the russian Enginner, smiling kindly, now full after the usual Day marked only by the regular Blends of *Aloe*, Fruit and other fresh medicinal Plants the Two Women had to prepare for him every other 30 or 45 Minutes, following the long, elaborate “Diet” I had drafted for him Four Months before, in September, when They had visited Me for the first Time and I had observed the neoplastic Mass that was killing him...

This Man, school Together of a famous russian Politician, whose Name, obviously, I cannot report here...

And the long, endless Tableful of strange, wonderful Food I had never seen nor eaten before, brought in specially from Tunguska for that second official Visit, while “Ivan” translated for Me the many russian Stories that are sometimes also told to Strangers, about their faraway strange Lands in Siberia, still inhabited by Packs of Wolves and Bears that could devour all the People of whole Villages, in the long, freezing Nights of their Winter with no Sun, and where sometimes a Plate of Wood, carved with a Name, or a Series of Names, is worth more than anything else...

And finally, their “Davai”, with which They bid Me goodbye before leaving...

How far away those Nine Years seemed, patiently waiting, every Night, beside that Phone I had now disconnected and that wasn't going to ring anymore...

I forced myself not to think about it.

The Room was cold at that Hour...

Yes.

But also that didn't Matter anymore...

Curious, though: Thoughts kept running, running, and I didn't know how to stop them...

And there was Silence...

Too much Silence.

I thought again of the many Phone-Calls I had received from People I didn't know and I was not going to meet, when They talked to Me in their stilted Italian, with Accents from all across the World.

Strangers who agreed with the humble Ideas I had published on my Website INTERNET "Le Cure Naturali" ...

Some of them had even visited Me, giving Me simple Gifts from their far-away Lands, because that is how civilized People behave, like the Russians had done in 2002 and the Americans in 2003, and all of this in exchange for a Piece of Advice for Somebody else who was waiting for an Answer...

People who, for Me, had symbolized the World...

And, in the meantime, the never-ending Calls from the many Italians who had come to know of the my Treatment against Cancer with *Aloe*, I had posted on my Website INTERNET "Le Cure Naturali" since August 2002, and who wanted to be part of the "Aloe", whatever the Results, because there are so many People who just won't give up, and still want to know and understand, before making a Decision.

Their usual Questions: "...is it essential to find that "darned" Plant, full of Thorns rather than Capsules, Pills o Tablets containing a concentrated Extract of "Aloe vera", easier to acquire..."

I thought back to the many People that had called Me over the Years, always mindful to respect the different Time-Zone, in order not to disturb, to exchange Pieces of Advice and Encouragement, in broken Italian, wich again took on all the Accents of the World.

"...After my Website INTERNET "Le Cure Naturali" had been shut down on 27th November 2005, They had been dumbstruck in Australia, and that was why fervently requested I send them my Work, which was not available on my Website anymore, so that They themselves could take over finishing the Translation from Italian, using the provisional Title "*Thousand Plants against Cancer without Chemo-Therapy*", then distributing it in alls English-speaking Countries..."

"...In South-Africa They had the "Cancer Bush" (*Sutherlandia frutescens*), perhaps even more powerful than *Aloe*, which could not be exported anymore, and They thanked Me for the free E-Book "*Thousand Plants against Cancer without Chemo-Therapy*, They had just received from Texas, which They were also going to spend locally..."

“...On a small Island in the greek Arcipelago They had a whole Valley full of wild *Aloes*, and Nobody had ever known anything about “Apoptosis”. Fortunately, She had studied Medicine in Perugia, She was a Doctress, and She was asking Permission to translate into Greek the whole treatment Protocol...*Xaire*...

“...In the Azores They weren't aware of anything I Was saying, but They had wild *Aloes* which extended right up to the great Cliffs of “Cora”, and They were asking if They could be of any Help to my Patients...”

“...In Amazonia They had realized that the Bark of “Graviola” (*Annona muricata*) was perhaps preferable to the Fruit of that same Plant...”

“...On the peruvian Andes the *Smilax aspera*, which had worked so well against Syphilis, seemed to also work well against Tumours, according to a local Doctor, and They were asking to share the Information...”

And young Doctress Ingrid informed Me that “...the *Scottish Thyme* (*Tymus serpillum*) which They had been using successfully for some Years, could perhaps also be useful for my Patients...to forgive Her for her poor Italian...and in the meantime She asked if She could translate into Icelandic the treatment Protocol... Thanks...”

From Val di Susa I was told They had started growing “Burdock”, “Wood Sorrel” and “Rhubarb”, but were having some Problems with “Slippery Elm”, which was not native in their Area...

From Liguria I got News that the Plantations of *Aloe arborescens* were growing well both on the Riviera di Levante and Riviera di Ponente...

From Alto Adige, Sud Tirol, I learnt that They were trying to produce undiluted Vinegar from their Apples, but only the ones grown following best Practices in “organic Farming”, which were then left to soak in excellent seasoned oak Barrels, like They did in Spain... “...Wiedersen...”

From Venezia I came to know that They had laboured to find the “Carota di Mare” (“Sea Carrot”), that is the famous *Daucus Gingidium* that in the Book “Herbario Novo”, written by Castore Durante for the Doge of the “Serenissima Repubblica” one Year before the Thirty Years War broke out (1618-1648), had been listed as One of the most interesting Plants to treat the “Cancaro”, which was how in Italy and in the XVII Century, They used to refer to the dark, mysterious Ailment that the Romans had already nominated, using the greek Name “Kakoezes”...

From Tuscany, I knew that They were cooperating with the nearby University of (... omissis...) and had started studying an Oil rich in *B17*, obtained from “bitter Almond” as per the Information passed on by Dioscoride, but They first needed to check the Previsions of Law on the Matter, Law which should, in their Opinion, be profoundly changed before proceeding with animal testing.

They had also worked hard regarding my Suggestion of studying “Cherry Kernels” to achieve a similar kind of anti-tumorous Oil, rich in *B17*, which would have to be tested on lab Animals, once the Ministry had given clearance to proceed.

But the coming Date of 30 April 2011, and the new European Union Directive, prevented them from achieving He best Result possible...

From the Central Apennines I came to know that They were working on starting organic Farming of at least Three of the Four Plants contained in the “Essiac” Formulation, in order to avoid the high importation Costs from Canada, since so many People were asking for these Plants, rich in *B17* and *Emodin*.

However, the Bark of “Slippery Elm” was One of the Four Plants in the Formulation, used for its proteolytic Enzymes, which were needed to dissolve the peripheral Necrosis that protected the large neoplastic Masses. They were asking, therefore, whether there were italian ancient Plants which had the same Type of proteolytic Enzymes and could be used instead of the “Slippery Elm” ...

From Umbria, or perhaps Marche, They told Me that on Mount “Nerone”, North of Gubbio, there were many wild medicinal Plants, and according to some Researchers, these could be perhaps the last Trace of ancient Farming of medicinal Plants, which had been carried out in those Areas since Times of Romans, if not by the Civilisation of Etruscans...

From Ischia I came to know that on the Slopes of Mount Epomeo They had finally pinpointed the perfect Valley to farm organically as many Plants of *Aloe* as possible...

From Acquaviva delle Fonti, between Bari and Gioia del Colle, They had starting farming of “Red Onion” again...

From Calabria, They reported that, according to some local Doctors, “Bergamot” could contain Vitamins able to induce “Apoptosis” in cancerous Cells and perhaps also in Sarcoma and Melanoma, and therefore They had started Farming in again, while in the Plateau of Sila They were trying to grow *Aloe* and at least Three of the Four Plants of the old “Essiac” Formulation...

From Sicily I was informed that in Avola They had started to grow bitter Almonds, “...come ai tempi di Plinio il Vecchio...” (“...just like in Plinius the Elder Times...”)

From Sardinia They told Me that They might have found the ancient italian Ginseng...

From Spain, a young cuban Doctress wrote to Me of her elderly Patient, ... born in Cuba in August 1926..., and suffering from bowel Cancer metastasized to the Liver..., for whose Treatment She had visited Me in my little private practice Office, ...formally requesting I did not ask the Name of this Patient or hers..., as She was the only One allowed to open and read his medical Record...

He was faring better, one Year after the Consultation I did in Trieste.

And She thanked Me for everything.

During that odd Meeting, which had taken place a Year earlier, I had been very surprised by that young cuban Doctress, with her wonderful spanish Inflection She imbued her Italian with.

Her fierce Willpower was clear from her Demeanour, in the way She held the medical Record, and in her nervous Gesticulating, then fixing Me with a proud Stare: a desperate Willpower which had kept her going on that long and dangerous Journey to Trieste, changing Three, Four if not Five Planes, and risking her own Life to reach my modest, untidy Clinic...

A Doctress who was perhaps one of the Four or Five Granddaughters of the elderly “Patient” I was not allowed to know the Name of, and most likely, One of the most experienced and respected Doctresses working in One of the most prestigious Hospitals in Cuba...

She had asked Me, Three Times, whether the “Patient” had to undergo Chemo-Therapy, since EVERYBODY - She repeated crying - EVERYBODY - suggested this Course of Action to her elderly “Patient” and to Her, because, They said, there was no valid Alternative...

Three Times I replied that, if the “Patient” was going to undergo Chemo-Therapy, He was surely going to die within a Year...

The Matter was also especially complex, given the Difficulty of the medical Case, of which She detailed the Specifics reading out loud again the Sections of the Reports I asked for...

But as I was drafting the usual treatment Protocol..., I noticed that She was already in the Know, and was clearly expecting and anticipating the Outline I was struggling to remember and write down..., when facing a bowel Cancer which had already metastasized into the Liver....

I realized then I was dealing a Doctress who was more prepared on the Matter than it seemed.

It was then that I figured that in Cuba They already had everything They needed to save the Life of that Man, born in August 1926, and most of all that the medical Team was led by an excellent Doctress, who had already perfectly understood the terrible Rules of Cancers with cannot be cheated.

She just needed a little Push...

I thought ahead and made the Doctress promise that the mysterious “Patient” was going to cook himself everything He was going to eat, never dining on Food prepared by others: I was worried, at that Point, about the Matter of the Nine essential AminoAcids that the “Patient” should not assimilate for the whole of the first Stage of the Treatment, the most critical One: a Matter that was going to be the only true Danger of the Treatment failing, since I had understood I was backed by a wonderful Doctress, extremely well-prepared on the Use of the many anti-cancer medicinal Plants Cuba is so rich in...

The Phone-Call from Spain from that very Doctress, one Year later, confirmed my Hopes.

For Seven Years I hadn't thought again of that Encounter.

Then, in October 2012, the great Publisher Iginio Pastrello launched in Italy the Italian Book He had suggested I write, dealing with Twenty-three of my clinical Cases who had followed in metabolic Therapy until April 2011: "*Guariti dal Cancro senza Chemio: 23 casi clinici documentati di guarigione*".

I sent out some Fifty E-MAILs all over the Globe, it took Me a whole Day, using a brand-new Chinese INTERNET Point that I had chosen as the perfect Location to spread the News abroad to all the fellow Doctors I cooperated with...

I also had some old E-MAILs Addresses in Cuba, which I had never used before, and I thought of informing those People, although I didn't recall very well who They were...

I didn't receive any Reply from Cuba, neither immediate nor late, though I had sent them only a few Lines, easily readable and understandable also by those who are not familiar with Italian.

However, the next Day, 18th October 2012, as I was absently listening to Radio RAI, I had a strange Feeling:

there was News that Radio Havana had broken the media Blackout They been in for a long Time, to issue an important, concise Press Release, which was addressed "Overseas" and stated more or less the following:

"...Non ha importanza quanto Tempo ci vorrà, ma l'importante è che i Popoli di tutto il Mondo abbiano finalmente compreso qual è la Strada giusta da seguire..."

("...It doesn't Matter how long it takes, what is important is that People all over the World have finally identified the right Path to follow...")

Sixth Chapter: the Defeat

The radioactive Rain from Fukushima had finally stopped falling on the Panes of my kitchen Window, but the old canadian PDA-2 Dosimeter, serial Number 89137, was never going to know that: the exhausted Heart of the data Analyser had given out, and its little red Light, which in that long Night of Suffering had gradually dimmed, was now out.

I looked outside.

Over the Roofs of the City, a faint Band of Light was crossing the Sky, signalling Dawn was near.

It was 5:30 am of 1st May 2011.

I went to make a Coffee: the first of a long Series of Coffees I was going to need to keep upright during that difficult first Day of the new, dark Age that was starting in Europe.

It was a grim Dawn of total Defeat.

Patients could no longer treat themselves with the over 30,000 or 50,000 natural Vitamins present in the almost 600,000 Species of Plants all over the World, only 20,000 of which were in Europe.

On the 1st May 2011, Directive 2004/24/CE came into Force, amending the Question of “traditional herbal Medicinal”, products expressed in Directive 2001/83/CE of 6th November 2001, which had provided for the Use of “herbal Medicinal” products on Humans until that Moment.

The European Commission described “traditional herbal medicinal Products” as follows, in Paragraph 29: “...*a herbal medicinal Product that fulfils the conditions laid down in Article 16.a...*”

The european Commission described “herbal Medicinal” as follows, in Paragraph 30: “...*any medicinal Product, exclusively containing as active Ingredients One or more herbal Substances, or One or more herbal Preparations, or One or more such herbal Substances in combination with One or more such herbal Preparations...*”

A simplified Registration procedure (hereinafter “traditional-use Registration”) is hereby established for herbal medicinal Products which fulfil all of the following Criteria:

- A) They have indications exclusively appropriate to traditional herbal medicinal Products which, by virtue of their Composition and Purpose, are intended and designed for Use without the Supervision of a medical Practitioner for diagnostic Purposes or for Prescription or monitoring of Treatment.*
- B) They are exclusively for Administration in Accordance with a specified Strength and Posology.*
- C) They are an oral, external and/or inhalation Preparation.*
- D) The period of traditional Use as laid down in Article 16c has elapsed.*
- E) The Data on the traditional Use of the medicinal Product are sufficient, in particular the product proves not to be harmful in the specified Conditions of Use and the pharmacological Effects or Efficacy of the medicinal Product are plausible on the Basis of long-standing Use and Experience.*

Of the Paragraphs above, the most important and insidious One, was Letter D, since it ratified a Period of traditional Use as per Article 16 quarter, Section 1, Letter C.

Specifically, Article 16 quarter, Section 1, Letter C, provided that: “... *bibliographical or expert Evidence to the Effect that the medicinal Product in Question, or a corresponding Product has been in medicinal Use throughout a Period of at least 30 Years preceding the Date of the Application, including at least 15 Years within the Community. At the Request of the member State where the Application for traditional-use Registration has been submitted, the Committee for herbal medicinal Products shall draw up an Opinion on the Adequacy of the Evidence of the long-standing Use of the Product, or of the corresponding Product. The member State shall submit relevant Documentation supporting the Referral...*”

Basically, the farming Businesses that had grown, processed and produced, until that Morning, the Juice of any medicinal Plant were going to be forced to remove it from the Market, if They weren't able to prove that it had been in Use continuously for at least 30 Years before the submission Date of the Application.

But the fundamental Matters of the Directive were at Points 3 and 5.

Analysing Point 3, We could find that: *“...A significant Number of medicinal Products, despite their long Tradition, do not fulfil the Requirements of a well-established medicinal Use with recognised Efficacy and an acceptable Level of Safety and are not eligible for a marketing Authorisation...”*

While in Point 5 it was established that: *“...However, even a long Tradition does not exclude the Possibility that there may be concerns with regard in the product’s Safety, and therefore the competent Authorities should be entitled to ask for all Data necessary for assessing the Safety. The quality Aspect of the medicinal Products is independent of its traditional Use so that no derogation should be made with regard to the necessary physico-chemical, biological and microbiological Tests. Products should comply with quality Standards in relevant european pharmacopoeia Monographs or those in the Pharmacopoeia of a member State.”*

The blatant Contradiction of the Two Points is staring us in the Face.

Indeed, on one Side it’s stated that a long Tradition of an herbal Medicine can avoid pre-clinical Testing, while on the other hand it’s reported that, since *“...even a long Tradition does not exclude the possibility that there may be concerns with Regard in the product’s Safety, and therefore the competent Authorities should be entitled to ask for all Data necessary for assessing the Safety...”*

The control Authorities should therefore request the necessary Data to evaluate the Safety of a traditional herbal Product.

Referring to the Assessment of a Product for Use on human Beings, the same Directive 2001/83/CE, provides that: *“...requires that Applications for Authorisation to place a medicinal Product on the Market have to be accompanied by a Dossier containing Particulars and Documents relating in particular to the Results of physico-chemical, biological or microbiological Tests as well as pharmacological and toxicological Tests and clinical Trials carried out on the Product and thus proving its Quality, Safety and Efficacy.”*

Basically, after 1st May 2011, if a farming Business wanted to sell a herbal Product (Juice, Plant or Parts of a Plant) detailing on the Package its “therapeutic” and/or “healing” Characteristics, this Product, even if it had been in Use for Thousands of Years, was going to be considered in the same Way as a “syntetic Drug” and, as such, had to comply with all Obligations and Testing required, from chemical and physical Testing to biological, microbiological, pharmacological, toxicological and clinical.

It was also necessary to have Authorisation provided for syntetic Drugs, like “Big Pharma” had done for its Pills, Capsules, Tablets and Vials of various Medicines.

The estimated registation Costs were going to amount to from around 80,000 Euro to at least 150,000 Euro per single Product: a bureaucratic Fee that a small or medium-sized Farming or herbal Business was never going to be able to sustain.

Only the big multinational pharmaceutical Corporations belonging to “Big Pharma” were going to be able to afford it, thus gaining sudden Control of a new market Niche: the herbal One, or “Green Products”.

From that Day on, They were also going to forbid food Supplements containing any medicinal Herb that hadn’t been previously authorized through those complicated and extremely expensive bureaucratic Steps.

But the new Legislation clearly stated that it wanted to place the “Safety” of european Citizens first, make it compulsory to write on the Label of the approved herbal Products their possible side Effects and any Interaction They may have with any Drugs.

And in the new “herbal” Products registered by “Big Green”, which were dry and therefore lacking any useful Quantity of Vitamins, They were going to allow the Addition of a Plethora of over a Hundred potentially toxic Additives, including Sodium Lauryl Sulphate, the controversial Aspartame and Sodium Ciclammate, the artificial Sweeteners as E-215, E-217 and E-219, the different Kinds of Polymers, like the Co-polymers of Butyl Methacrylate (BA), Polyvinyl-Pyrrolidone, Polyvinyl Alcohol (PVA), and many more...

Patients were not going to find *Aloe*, *Graviola* and many other powerful natural Substances on Sale, as They had now become illegal forever...

Cancer Patients were going to get treated exclusively with Chemo-Therapy...

30,000 (Thirty Thousand) natural Vitamins, or perhaps 50,000 (Fifty Thousand), contained in around 600,000 (Six Hundred Thousand) Species of harmless Plants were not going to be adopted anymore...

Over Nine Years I had collected and catalogued Hundreds of scientific Works on over One Thousand anti-cancer medicinal Plants, and I had my Patients use only a small Portion of it, due to the practical Impossibility of Retrieving them all, since They had to be fresh and recently harvested, in the Fields and in the Woods, in order not to lose those most precious Vitamins which the dry herbal Products, prepared in Capsules, Pills and Tablets did NOT MORE have...

The true Cure against Cancer, in my Opinion, needed to be based on the Idea of raising the Level of Vitamins in the Patients' Blood from One Hundred to One Thousand, thus causing the natural Apoptosis of the neoplastic Cells, may They be Cancer, Leukaemia, Lymphoma, Glioma, Sarcoma, Melanoma, Multiple Myeloma, Neuroblastoma or other still.

There were Hundreds of Plants from which to choose the most apt for each specific clinical Case:

Abelmoscythus moschatus, Acalypha indica, Acorus calamus, Actinidia chinensis, Adiantum capillus veneris, Ailanthus glandulosa, Ajuga pyramidalis, Ajuga reptans, Albizzia lebbek, Alchimilla alpina, Alchimilla vulgaris, Allium cepa, Allium sativum, Alpinia oxyphylla, Althaea officinalis, Anethum graveolens, Angelica archangelica, Aniba roseadora, Annona muricata, Annona squamosa, Antennaria dioica, Antyllis alpestris, Apium graveolens, Aquilaria agallocha, Aralia racemosa, Arctium lappa, Argemone mexicana, Argyreia speciosa, Artemisia abrotanum, Artemisia absinthium, Artemisia dracunculus, Asparagus cochinchinensis, Asparagus racemosus, Astragalus membranaceus, Atractylodes ovata, Azadirachta indica, Bacopa monnieri, Bambusa arundinacea, Betula alba, Boerhaavia diffusa, Boswellia carterii, Boswellia serrata, Buxus sempervirens, Caesalpinia sappan, Calendula silvestris, Campanula latifolia, Cananga odorata, Capaifera officinalis, Capparis spinosa, Capsicum frutescens, Capsicum fasciculatum, Capsicum annuum, Cardamine pratensis, Carlina acaulis, Carpinus betulus, Carum carvi, Carum nigrum, Caryophyllus aromaticus, Cassia angustifolia, Cassia occidentalis, Cayaponia tayuya, Ceanothus americanus, Celastrus scandens, Cerastium alpinum, Cetraria islandica, Chimaphila umbellate, Chondrus crispus, Cinchona calisaya, Cinchona succirubra, Cinnamomum zeylanicum, Cirsium spinosissimum, Cissampelos pareira, Citrus aurantium bergamia, Citrullus colocynthis, Citrus limonum, Cochlearia armoracia, Coriandrum sativum, Cosciniun fenestratum, Crocus sativus, Curcuma longa, Curcuma zedoaria, Cymbopogon nardus, Cymbopogon citratus, Cynara scolymus, Draba aizoides, Drinaria fortunei, Drosera anglica, Drosera intermedia, Drosera

rotundifolia, *Dryobalanops aromatica*, *Echinacea angustifolia*, *Echinacea pallida*,
Echinacea purpurea, *Eclipta alba*, *Elettaria cardamomum*, *Emblica officinalis*,
Epilobium angustifolium, *Epilobium parviflorum*, *Equisetum arvense*, *Erithrea*
antaurium, *Erythrina mulungu*, *Erythroxyllum catuaba*, *Eucalyptus globulus*, *Eugenia*
caryophyllata, *Eupatorium perfoliatum*, *Eupatorium purpureum*, *Eurycoma*
longifolia, *Euspongia officinalis*, *Foeniculum vulgare*, *Foeniculum sativum*,
Frangula alnus, *Galium aparine*, *Galphimia glauca*, *Gordonia axillaris*, *Gardenia*
jasminoides, *Gentiana germanica*, *Geranium robertianum*, *Glechoma hederaceum*,
Glycyrrhiza glabra, *Gnafalium supinum*, *Goniothalamus species*, *Grindelia*
camporum, *Grindelia squarrosa*, *Hibiscus abelmoschus*, *Hibiscus sabdaiffa*,
Hieracium pilosella, *Holarrhena antidysenterica*, *Houttuynia cordata*, *Hydnophytum*
formicarum, *Hypericum perforatum*, *Hypericum richeri*, *Hypoxis hemerocallidea*,
Hyssopus officinalis, *Ilex paraguariensis*, *Inesinae calea*, *Lamium album*, *Lapsana*
communis, *Larrea divaricata*, *Larrea mexicana*, *Laurus nobilis*, *Lavandula*
officinalis, *Lavandula angustifolia*, *Lavandula stoechas*, *Lepidium meyenii*,
Lepidozamia peroffskyana, *Lettsomia nervosa*, *Leucanthemopsis alpina*, *Lippia*
citriodora, *Lobaria pulmonaria*, *Lonicera caprifolium*, *Lycopodium clavatum*,
Lysimachia nummularia, *Luffa operculata*, *Mahonia aquifolium*, *Majorana hortensis*,
Malva sivestris, *Malva vulgaris*, *Momordica charantia*, *Marasdenia cundurango*,
Marrubium vulgare, *Maytenus illicifolia*, *Maytenus krukovit*, *Melaleuca alternifolia*,
Melaleuca leucodendron, *Melaleuca minor*, *Melaleuca quinquenervia*, *Melaleuca*
viridiflora, *Melissa monarda*, *Melissa officinalis*, *Mentha species*, *Meum mutellina*,
Mimosa species, *Momordica charantia*, *Morinda citrifolia*, *Moringa pterygosperma*,
Muehenbeckia volcanica, *Myrica cerifera*, *Myristica fragrans*, *Myristica sebifera*,
Myroxylon balsamum, *Myroxylon pereirae*, *Myrtus communis*, *Nelumbo nucifera*,
Nepeta cataria, *Nigella sativa*, *Ochrosia elliptica*, *Ocimum basilicum*, *Ocimum*
sanctum, *Ocimum tenuiflorum*, *Origanum vulgare*, *Panax ginseng*, *Pedicularis*
rostrato-capitata, *Pereskia bleo*, *Peucedanum ostruthium*, *Peucedanum graveolens*,
Pfaffia paniculata, *Picramnia antidesma*, *Pimenta racemosa*, *Pimpinella anisum*,

Seventh Chapter: the Feast of First May

I don't know how long I stood at the Window.

It was quite a long while later that I remembered that I still kept in the Clinic where I worked, in via Machiavelli 10, all 23 medical Records of the Patients I had been treating until a few Hours earlier: 23 dangerous paper Documents which proved that it was possible to heal Cancer even without Chemo-Therapy, but simply reducing to a minimum the Proteins and B12 Vitamin and trying to raise from 100 (One Hundred) to 1,000 (One Thousand) Times the Concentrations of Hundreds of anti-cancer natural Vitamins, completely squeezed by well manufactured Fruit-Presses, for the natural Apoptosis of the neoplastic Cells, may They be Cancer, Leukaemia, Lymphoma, Glioma, Sarcoma, Melanoma, Multiple Myeloma or other still.

Fresh-Juice from Carrot, Garlic, Onion, Red-Onion, Aloe, Mimosa, Berry of Juniper, Artichoke, Orange (with Seeds), Grape-Fruit (with Seeds), Strawberry, Milk Thistle, Gardenia, Southernwood, Feverfew, Roselle, Clove, Ginseng, Iperico, Cardamom, Cinnamon, Mustard, Laurel, Verbena, Citronella, Strawberry-Tree, Myrtle, Mint, Kiwi (with Seeds), Citron, Zucchini (with Seeds), Salad-Burnet, Lungwort, Radish, Chive, Red-Beet, Chicory, Tarragon, Berberry, Pomegranate (with Seeds), Angelica, Taraxacum, Garden-Savory, Tangerine (with Seeds), Turmeric, Lettuce, Wild-Cabbage, Cauliflower, Apple (with Seeds), Raspberry, Red-Currant, Fig-Tree, Plum (with Seeds), Lemon (with Seeds), Peach (with Seeds), Watermelon (with Seeds), Melon (with Seeds), Sarsaparilla, Caper, Mallow, Tomato (with Seeds), Lemon-Balm, Prickly-Pear (to remove Briers), Marjoram, Garden-Rocket, Sambuk, Parsley, Basil, Rosemary, Bilberry, Thime, Blackberry, Apricot (with Seeds), Cherry, Grapes (with Seeds), Ginger, Papaw (with Seeds), Red-Pepper, Ananas (with Seeds), Burdock, Chick-Weed, Shallot, Holy-Thistle, Paprika, Saffron, Epilobe, Mango (with Seeds), Endive, Bergamot...

Information that was too dangerous.

I decided that the very next Morning I was going to go to my Clinic, before the medical Records could "disappear" and, since I had to take some 23 heavy Binders, I resolved to take my Car, an old dark blue FIAT Punto, even if the Clinic wasn't far from .my Home.

But Half-way there, when from via Giulia and via Battisti I was going to take via Carducci, I had to stop suddenly.

I was almost at the Intersection with One of the main Roads of the City when I had to hit the worn-out Brakes, causing them to squeal and the Tyres to screech, even if the traffic Light was signalling I could pass.

A traffic Policeman, half serious and half amused, had raised his signalling Disk in front of my Windscreen...

In front of Me, a peaceful Crowd of People of all Ages had just poured into the Crossroad between via Carducci and via Battisti: it was a large Procession of celebrating People which filled the large central Road with Shouts of Joy, Whistles, coloured Balloons and enormous red Banners.

I parked on the Pavement, as indicated by the traffic Policeman, and sat down on the Hood of my Car, thinking of those medical Records I was now not going to be able to retrieve before Midday...

It was the First May.

A Day that all People in the World love to celebrate as the Holiday of Life, of the Sun, of Joy and Peace.

Since immemorial Time, even before History as We know it began, the spring Equinox had always been the Celebration of the Sun...

The first and fundamental Number in ancient Tradition, the Number One, the Circle, or Delta, which had always been described by ancient Civilisations as the Symbol of the Supreme God, i.e. the Sun, always Male, contrasting with the Moon's Goddess, his Wife.

It was like this for all Civilisations in the ancient World...

It was the First Mover, the Cosmic Point, the Spirit, the Absolute, that which identified with the Sun and was considered the "Spiritus Mundi", the "Divine Principle", the "Brahma", the "Spirit of Life", the "Dwelling of God", the "Unity", the *Yang* for the Chinesees, *Adonai* for the Jewish, the God *Bragi* of the Vikings, the "Place where the Great Spirit dwells", the "Blessed Place of Peace", the "Pleroma", the "Nous", over which Nobody could claim any Power, not even the ancient King of the Gods of Olympus, who was known as *Zeus* by the Greeks, *Giove, Jovis, Juppiter* by the Romans, *Tunia* or *Tinia* by the Etruscans, *Odin-Wotan* by the Germanic-Scandinavians, *Dagda* by the Irish, *Perun* or *Perkun* by the Slavic-Russians, *Horus* by the Egyptianes, *Enlil* by the Sumerians, *Marduk* by the Babylonians, *Indra* by the Vedic-Hindus...

He was the “Shining God”, called *Deva* by Vedic-Hindus, *Daeva* by Persians, *Deus* by the Romans, *Devas* by the Lithuanians, *Tivar* by the Germanics, *Theos* by the Greeks, *Dazbog* by Slavic-Russians.

He was the *Monoboza*, or “Great Manitou”, of the Native Americans, equivalent to *Rajapati*, the “Lord of Creation” of Hinduism, also known as *Brahma*.

He was the *Mikabo* of the Algonquian Native Americans, whose Name was far too similar to Japanese God *Mikado*, last Legacy of an ancient Asian Supremacy in North-America, before known History, and well-reported by the I-CHING of the Chinese, from the third Hexagram to eighth Hexagram...

Conversely, the Navajos from South-West America still use the Word “Sha” to represent the Sun. The odd Connection with the Tungusians of Siberia, the Huns, and the Mongolians (*Sha*) is clear. A Connection that is actually not so odd.

We could refer to the Tradition of Vedic-Hindus of “Parashurama” and “Mahabharata”, to the *Gilgamesh* of the Sumerians, Assyrians, Babylonians, Hittites and Hurrians, or the Greek-Roman Tradition of the ancient War of the Twins *Castor* and *Pollux*, or *Lycus* and *Nycteus/Pittheus*, fought against the Asian Brothers *Idas* and *Lynceus*, *Anphion* and *Zethus*, *Perses* and *Astraeus*, that is *Agamemnon* and *Menelaus*, in the Time of *Atalanta* (*Atlante* as “female”, before of God *Atlante/Atlas*...).

That refers to a Time well before the white Populations previously settled into the current Central Canada were going to find shelter on an insular Continent stretching in the Central Atlantic Ocean.

It was after the Start of the zodiac Age of “Libra” (“Krita-Yuga” for Vedic-Hindus), around 15,270 Before Christ, and it was originated then that the white People of “Atlantis” (Atlant-IDE, Earth of *Atlante/Atlas*), namely of *Orion*, or *Ettore-Hector* (“Iliade” of Homer), or *Attore* (“Tebaide” of Heschylus), or *Icarius-Boutes*, equivalent to the Egyptian *Osiris* (Osir-IDE, Earth of *Osir/Orion*), the Persian *Syamak* (the sacred Book “Sha-Nameh” by Ferdowsi), the Vedic-Hindu *Kryshna-Gautama*, the Celtic-Germanic-Scandinavian *Balder*, or *Skioldo* of Saxo Grammaticus (“Gesta Danorum”, first Book, third Part), the Irish Bull *Donn*, the Persian Bull *Abudad*, the Slavic-Russian Bull *Kurke*: basically the *Tammuz-Dumuzi-Damu* or *Gugalanna* (celestial Bull) of the Sumerians, Assyrians and Babylonians...

Returning to the Asian People, who were governing most of North-America at the Time, We can also Notice that, in the most ancient Cultures of Siberia, the Word “Sha” could also mean “Lord-God”, beside “Day” or “Sun”.

The term “Sha” is also similar to “Ka” (in Sanskrit), which is the same as the old egyptian Word for Soul (“Ka”), therefore close enough to the old egyptian Word “Ra”, which identified both the “Sun” and the “Lord”: a term, “Ra”, which was strangely used also by the far-away Maores of the South Pacific, and whose Origin is still Subject to debate...

Another Word which is similar to “Ra” but only in its meaning of “Lord” and not of “Sun”, can be found in other, different People: “Rex-Regis” for the Romans, “Raja” for the Vedic-Hindus...

While in India the Sun was called, in Sanskrit, “Ravi”.

Basically, We can notice that in all ancient Civilisations the “God of the Sun” referred always to the “visible Sun”, called in the many ways of ancient Tradition, the true and only deity: *Hyperion-Helios-Haelios* in Greece, *Elyon* for the Israelites, *Apollo* for the Romans, *Aplu* for the Etruscans, *Belenus* for the Celtikes, *Ra* for the old Egyptianes, *Asshur* for the Assyrians, *Utu* for the Sumerians, *Shamash* for the Babylonians, *Brahma* for the Vedas in ancient India...

The Sun was “Brahma” for the Vedic-Hindus, “Nirvana”, the “Source of all Light”, but it was also the God “Dharma”, blending the Two Terms (*Dharma-Brahma*).

For the Chineses it was the “Chu-ang Tzu”, i.e. the “Fundament of the Sky”, or “Tao”, the latter represented with Two Ideograms where the first was the stylised Image of a “Foot”, meaning “Road” or “Walk”, and the second was drawn like a shining human Face, meaning “Emanation of Thoughts”.

I went back to watch the Crowd who had now taken over all via Carducci.

The Sun was shining bright, it was a warm First of May, a Date which had been the same for Thousands of Years...

Indeed, it had been between 30 th April and 1st May, the old Spring Equinox of the previous zodiac Age of “Aries” (from 2,300 Before Christ to 150 Before Christ) that, worshipping the “God of the Sun” *Belenus*, the ancient Celtikes of “Celtiberia” (Spain and Portugal), of “Gallia” (France), of “Britannia” (Goddess *Brigantia-Brigid* ?) and Ibernica (Ireland) held their great Celebration of the “Shining Fire”.

Its bright Red was the sacred Symbol of this Celebration, when the Druids led the Cattle towards the Middle of the Ashes of the “great Fire” that had lit up the Night in their Village, aiming at protecting the “horned Cattle” from the great Dangers that were going to threaten in during the Summer: a Memory, perhaps, of a forgotten Catastrophe, perhaps the One cited by Platone...

But it was also the same Celebration of Vikings, and of the undefeated germanic Tribes of the North, that Rome hadn't been able to conquer, and still of the other slavic-germanic Tribes which had been venturing more and more to the East for at least Six Thousand Years, right up to the Borders of an ancient China We shall never know, as the One that was unified in 221 Before Christ is just the “modern” China, the current one, even if it also worshipped the “God of the Sun”, which the Chineses thought was being carried by a giant celestial Dragon, since the most ancient, mysterious Times in their forgotten Past...

We don't know how to justify the Existence of chinese Writings carved in turtle Shells used for divinatory Purposes, dating back to the Seventh Millenium Before Christ (6,600 B.C.), and found around Jiahu, in the South Henan Region, in the Middle of the Valley of the “Yellow River” (Huang Ho), where the ancient Priests used to carve on Shells the Questions They wanted to ask the Gods: turtle Shells which were then put over the Fire and, based on the Cracks and Fissures that appeared, represented the Response of the Gods...

Returning to the West, We can also remember the strange Story of the God who had been the Son of the Sun-God and of the Moon-Goddess, basically the famous *Hector-Ettore* (Eu-Tauros, the “good Bull”) of the “Iliade”, Son of the Sun-King *Priamus* and the Moon-Queen *Ecuba* (*Ecate-Ecabe*, Moon-Goddess), and which again refers to *Krysna*, who also died at the End of the First Age of the ancient World...

Just like We shall never know the true Meaning of the God answering to the Names *Krysna-Gautama*, *Atlante-Atlas*, *Ettore-Attore-Hector*, *Skioldo* (“SKIODUNGI”), *Orione-Orion*, *Osiride-Osiris*, *Gugalanna*, *Abudad*, *Tammuz-Dumuzi-Damu*, *Donn*, *Kurke*, *Balder-Baldero*, “...He who is reborn after the great Catastrophe...”.

It was also, perhaps, the true Meaning of the ancient “Christmas”, that is of *Rama*, Son of *Dasharata* (*Dardanus* ?), direct Reincarnation of *Krysna*, or of “Matali”, Charioteer of the “Gandarva” (Centaur, People of Sagittarius) and Ally of *Arjuna*...

A Christmas some Twelve Thousand Years old, which started after an ancient “Lent”, Forty Days of Fasting, and preceded an archaic “Easter” which has nothing in common with the known Festivity of the Jewish and the Christians: an “Easter” reminiscent of an enigmatic “Jump” and which seems to correspond to the famous “Saturnalia” of the Etruscans and Romans, with the “Samuin” or “Samain” of the Celtikes, Germanikes and Vikings, with the “Halloween” of the Irish Celtikes (*Tuatha de’ Dannan*), and with “Zaduszny” (All Soul’s Day) of the Slavikes and Russians...

Some forty Days that were perhaps reminiscent of the Forty-day Period when the Constellation of the “Pleiadi” (“Krittika” in Sanskrit), is no longer visible, perhaps a Symbol of what We know as Azores, and so the last Strip of Land of *Krysna-Balder*.

The Azores themselves could represent that which the ancient Egyptians symbolised with the “Djed”, i.e. the “Backbone” of *Osiride-Osiris* which rested in the “Nile” after He had been “sliced” to fifteen Pieces by *Seth*, the “God of Chaos and Death”, as the Vedic-Hindu God *Shiva*, as the Etruscan God *Sethlans*, the Egyptian God *Sobek*, the Roman God *Saturn*, the Germanic-Viking God *Sutr* (Name similar to Sanskrit Word “Satre”, as Enemy).

Forty Days which referred to the Time before the funeral Wake of Greeks that was held exactly Forty Days after the Funeral of a great Warrior: a Tradition that can still be found in Sardinia.

And Forty Days was also how long Noah’s Flood lasted...

But Noah's Flood seems to blend with the even more ancient One of Enoch reported in the "Book of Giants", and perhaps with an even earlier Flood, which apparently the Bible doesn't recall, though it speaks of a Time when "...*Giants walked on the Earth...*"

And perhaps Forty were the Days of a terrible, ancient Fasting on some makeshift Arks, at the Dawn of a new, dark Age, when "*Those who came from the deep Sea*", the "Pelagians" (the "Pelasgoi" of the Greeks, the "Penates" of the Etruscans and Romans) had perhaps been the Survivors who had to undergo a fearsome Voyage from the Central Atlantic Ocean, from Scandinavia (Skandeia, *Ursa Minor*) and North-America to Gibraltar and from there to the Eastern Mediterranean Sea, reaching the Coasts of an ancient Egypt which We shall never know, where the Delta of the Nile still wasn't formed, because the White Nile was still flowing in the Direction of the Congo River, as its Tributary, while the current Desert of Sahara was still an immense Sea...

And if anything really disappeared in the West, common Land of the Celtikes, Vikings, Germanikes, Slavikes, Russians, Italikes, Albanianes, Greeks, Turkes, Armenians, Kurdes, Yazidish, Egyptianes, Persianes, Arabes, Syrians, Israelites, Afghanes, Pakistanes, Vedic-Hindus of the ancient India, it was perhaps in that which the Tradition of Greeks recalls as the Catastrophe of *Phaeton*, which, according to Platone, can be dated to Nine Thousand Years before him (ca 9,600 Before Christ) and which according to "Mahabharata" and the Tradition of Tamil could be dated to 9,564 Before Christ...

The Story of *Balder's* Death could also represent, in the Mytology of the Vikings, a possible Allegory of the End of Atlantis, if We want to identify it as *Balder's* "Body", while his young Bride *Nanna* (*Inanna* for the Sumerians, *Diana* or *Anna* for the Romans, *Dana* or *Ana* for the Celtikes), would correspond to a certain Territory in North-America, who died with him.

It's stated that also *Nanna* (young "Moon-Goddess"), Daughter of the Goddess *Nep* (elder "Moon-Goddess", *Hel*, equivalent to *Ecate-Ecabe-Ecuba*), died with *Balder*, and both Bodies were laid down on their great Ship "Ring Horn" (the Two "Cornua" of Equator, as: *Cornua Circuli Aequinoctialis*), which carried the mysterious "Draupnir Ring" at the Stern's Right, and was pushed into the Sea and burnt down with a shower of white fiery Arrows.

Here, the white Colour could be a Representation of the Tails of Comets which may have fallen on North-America, Mexico-Yucatan-Nicaragua, South-America, Antarctica and Atlantis at the End of the Late Pleistocene, in 9,600 Before Christ (when the great sudden mass Extinction of the Megafauna in most of the World came to pass), in what the Egyptian Tradition still identifies as the 17th Day in the zodiac Month of “Scorpio”.

Balder would be Atlantis, well represented by the Constellation of *Arcturus-Icarius-Boutes*; He’s lying out in the Middle of a giant “Ship” formed by the Four great Constellations of *Ursa Major* (Stern of Ship, North-America), *Leo Minor* (Base of Mast of Ship, Mexico and Yucatan/Nicaragua), *Leo Major* (Hull of Ship, South-America), *Berenice Coma* and *Virgo* (Bow of Ship, Antarctica).

But this only with the Constellations of Hevelius, mirrorized to Looking-Glass...

And the Constellation of *Arcturus-Icarius-Boutes* has at its Feet a small Constellation of Two or Three hound Dogs, a clear Reference to the Antilles, and consequently to Cuba, Hispaniola and Puerto Rico; basically, to the mysterious “Hesperides” Islands, citing a Paragraph from Plinius the Elder (“Naturalis Historia”, sixth Book, 201), where the the great old-roman Scientist identified a Forty-day Navigation to reach the Islands over the Atlantic Ocean.

He wrote: “...Beyond the Gorgades Islands (Cape Verde) We know can find the Hesperides Islands, after Forty Days of Navigation in the innermost Depths of the Sea, as stated also by Statius Sebosus...” (SEE Statius Sebosus in: Solino, “Collectanea Rerum Memorabilium”, LVI, 13-19).

And the Hesperides Islands could symbolise the Three *Parcae* of the Romans, the Three *Moirai* of the Greeks, the Three *Norns* (*Noire*) of the Germanics and Scandinavians, the Three *Lasae* of the Etruscans, the Three *Rozenice* of the Slavics and Russians...

It is easy to recognise in the Great Bay of Hudson the mysterious “Draupnir Ring” which was set by *Odin-Wotan* at the “Right of the Stern” of the great pyre Ship which was then going to be burnt down.

It could also be the Compass identifying the Magnetic North Pole, which can still be found in that Area, between the Baffin Bay and the Hudson Bay, a Compass placed by *Odin-Wotan* on *Balder*’s pyre Ship.

We could finally understand the misterious allegoric Meaning of the magical “Ring” of *Odin-Wotan*, “...capable of multiplying Nine Times an its own...”.

In this dantesque Picture of a whole Ship in Flames (North-America, Mexico-Yucatan/Nicaragua, Atlantis, South-America, Antarctica destroyed by the *Phaethon* Comets), a female Titan called “Yrrokin” makes his Entrance.

She takes it upon himself to carry the giant Ship out to Sea, the final resting Place of the divine Bodies of *Balder* and *Nanna*, pushing the “Ring Horn” from the Stern, causing a devastating Seaquake on the Way...

Although there is a very brief and fleeting Presence in the Description of the viking Funeral of *Balder*, this Divinity is apparently out of Place, since it’s not reported in any other germanic or viking Myth...

Curiously enough, the Name “Yrrokin” unequivocally refers to the specific Term “Irikoiw” of the Native Americans of Algonquian (South-East Canada and North-East USA), with which the Tribes of Iroquois also identified the “Snake”: there ensues the possible feminine Equivalence of the “Land”, meant as “Land of the Snake”, and therefore the Identification of Siberia, seen as the Land of the “Snake-Dragon” (Constellation of the Dragon) from which the Stern of the great Ship had just separated, with the final Disappearance of that narrow Strip of Land known as “Beringia”, and followed by the first Raising of the Sea, which happened in a post-atlantis Age, and last Reminder of an ancient Bridge of Lands which used to connect Alaska and Siberia....

The Constellation of *Dragon* still seem to represent the Volga Upland (Head), the Urals (Back), Tunguska (Belly), Japan (hind Leg), Taiwan-Formosa (Foot) and the Altai Mountains (front Leg).

This happened in an Age where most of Eastern Europe, Siberia and Central and Northern China were still under the Waters of a great Ocean (Sea of “Stige”, or Styx) which connected the Baltic Sea to the Black Sea and the Caspian Sea, and covered the whole of the Siberian Plain, the Two Deserts of Makla-Makan and Gobi...

It's difficult not to think of a real, ancient Tradition, of a remote Civilisation that existed and has been lost, and that celebrated, then as now, the Day of the spring Equinox: the Day when the "Sun-God" was resurrected victorious...

And what I was seeing sitting on the Hood of my Car, was the same Celebration which had been kept and passed on in Dozens of different Languages, for Thousands of Years, by People apparently so different, but actually connected by an ancient common Culture, lost in the Depth of the Ocean...

And the red Colour was its most ancient Symbol, ever since Druids and the Celtikes, and even earlier...

Perhaps even before Cyrus the Great founded, at 550 Before Christ, the modern Persia, if We care to see a specific Overlapping of the Myth of *Perseus* and his *Pegasus*-Horse with the persian *Rostam* and his *Rakesh*-Horse (the sacred Book "Sha-Nameh" by Ferdowsi), where *Rostam*, in the "Ramayana", seems to be equivalent of the great *Barata*, Brother of *Rama* (post-atlantis Europeans) and of *Shatrugna* (Arabes).

Perseus, *Rostam* and *Barata*, though post-Atlantis beings, move the true Story of Persians to even before the great Catastrophe mentioned by Platone, if We identify them as the ancient People of *Menoetius*, Brother of *Atlantis*, in *Balarama* ("Mahabharata") Brother of *Kryсна*, in *Scato* (Saxo Grammaticus, "Gesta Danorum", first Book, third Part) Brother of *Skioldo*, in *Erechtheus*, Brother of *Boutes*, in *Tyndareus*, Brother of *Icarius*, in *Onkesto*, Brother of *Thersites-Tiresias*: basically, as the ancient "white" People that still desperately kept its Domain on the "hind Leg" of the famous *Ursa Major*, whose "Head" was the current Alaska, and the "front Leg" were the Rocky Mountains, already fallen to the asian "People of Dragon" in zodiac Age of *Sagittarius* (19,600 Before Christ) ...

This, Ten Thousand Years before the lost War of Atlantis (SEE "Parashurama", "Mahabharata", first Book of Saxo Grammaticus on "Gesta Danorum", and the etruscan-roman Myth of the Two Sisters *Didone-Dione* and *Anna*, in "Eneide" by Vergilius).

We should also backdate the true Story of the Arabes to the Sixteenth or Eighteenth Millenium Before Christ, since their Land (Constellation of *Scorpio*, *Cerberus Dog*, *Lupus*, and *Canis Minoris*) seems to be the same of *Castor*, *Polydorus* and *Ajax the Younger* of the greek Tradition, and of *Remus*, One of the Twin who founded Rama/Roma (the etruscan-roman Goddess "Rom-IDE") ...

He was too *Garm*, the “Dog of the Dead” in germanic-viking Tradition, but reported also as the heroic younger Twin of *Bessus*, both mentioned by Saxo Grammaticus in his first Book, fourth Part, on the “Gesta Danorum” ...

It seems also to be the same Land of the mysterious egyptian “Jackal-God” *Anubis*, Brother of *Bata* ...

He was the younger Twin *Sahadeva* in the “Mahabharata”, and *Shatrugna* (Sha-Truyaka, “Three Times King”) in the “Ramayana” ...

It’s the famous People of “White Elves” from Alf-Heim of germanic-viking Tradition...

A white People who lived in Arabia well before the Birth of *Atlantis-Kryсна-Balder* and whose sacred Land, starting from the “Tail” of the *Scorpio*, identifiable in the Shores of Sea of Nafud (perhaps the ancient “Acheront’s Sea”, or “Keront Sea”) in the Late Pleistocene, reached to the “Head” of *Scorpio* (ethiopian Highlands), and was lost Hundred Times under the savage, repeated Invasions of the “People of the Dragon”, and Hundred Times reconquered with the Blood...

But also the Israelites, in this Light, seem to be a most ancient People, almost as if it had actually been the vedic-hindu *Daksha*, beheaded by *Shiva*, and We would then identify it as the lost People of India of *Uranus* and *Tantalus-Talaus*, invaded by the Mongols of *Kronos* and *Agamennon-Anphiaraus*, the Mongols of *Angra Manyu* (the sacred Book “Sha-Nameh” by Ferdowsi), or still the mysterious *Anu* of the sumerian Tradition, killed by *Nergal*, or *Apsu*, killed by *Kingu*, according to the Babylonians...

He was the old *Anchises* sung by Vergilius in the “Eneide”, or the old *Drupada*, of the “Mahabharata”, the egyptian God *Ptah*, and finally the famous *Abele*, killed by *Cain*...

All of this happened at the beginning of the zodiac Age of Virgo (13,100 Before Christ), and the People of *Atlantis*, Son of the People of *Uranum*, could not save them from what now seems to have been the first true Genocide of History suffered by Hyksos, as Issedones, as Essenes, namely the Jews...

And also...

In this View, also the South of China and Indochina seem to be more ancient than We know, if We identify in the heroic *Iravan*, Son of the beautiful *Ulupi* of the “Reign of Naga”, the last Trace of a desperate, vain Resistance of that asian People to Powerful of the “People of the Dragon”, which in the End conquered also the “Land of the Turtle” (Constellation of *Cassiopeia*: South of China, Indochina, Philippine, Borneo, Java, Sumatra, Sulawest and Malay Archipelago), the Home of the “Han”, which form the main Component (Today 92-95%) of the current chinese Population.

In this View, the immortal Verses of the vedic-hindu “Mahabharata” sound painful, when They sing the hopeless cavalry Charge of the heroic *Iravan*, during *Kryсна*’s bloody final Battle against One Hundred “Kaurava” (asian People of Dragon).

It’s perhaps the most ancient written Testament of a chinese cavalry Charge, which ended in a Defeat with the Arrival of the “Rakshasa”, ...*Blacks as the Pitch and the Coal*... who overturned the initial chinese Victory:

“...In the eighth Day of Battle of Kuru Kshetra, Iravan, the great Son of Arjuna and Ulupi, Princess of Naga, joined in the Battle. He led a Division of Warriors riding himalayan spotted-Horses, wearing chain Mails and Saddles in golden Metal, and charged against the vast enemy Cavalry over the Hill of Gandahara, led by Six younger Brothers of Shakuni, and of whom only Rishada survived. But it was then that the savage Alambusha, Chief of the Rakshasa, intervened and killed Iravan in a terrible, final Counterattack...”

The “Mahabharata” states that it all happened in the eight Day of the “Kuru Kshetra” (Field of Kuru), which We can refer to 9,700 Before Christ, Thirteen Centuries after the beginning of the zodiac Age of *Leo Major* (10,950 Before Christ).

We can therefore conclude that the first documented chinese cavalry Charge could have happened in the South of China, around 9,660 Before Christ, over what, at the Time, were the simple Hills of “Gandahara” and which became, following the Catastrophe in the Late Pleistocene, the current Mountains of the Himalayas and Tibet...

I watched with increasing Fascination those long red Banners, happy Mothers with their Children running around, and tried to imagine other Places, of One Thousand, or Five Thousand Years ago, and more...

Small fortified Villages, like the one some People of Slavikes, Germanikes and Scandinavians had built, One Thousand Years after the Death of *Balder-Kryсна-Hector*, on the Banks of a little River that was going to be called “Moscova”.

A little Village that was named with the sacred Name of “Mokoz”: the greek *Athena*, the etruscan-roman *Minerva*, the egyptian *Neith*, or *Sekmet*, the vedic-hindu *Sarasvati*, or *Durga*, the celtic *Brigid-Brigantia*, or *Durge*, the germanic-viking *Modgurd*, the “Girl of Giants”, the “Goat” *Amaltea-Heidrun* of *Giove-Jovis-Juppiter-Zeus-Odin-Wotan*...

Athena-Minerva was the young Daughter of *Metide* (Met-IDE, the “middle Land”), and the same *Athena-Minerva* was born with Spear, Shield and Armour from the “Head” of *Zeus-Giove*: the *Sagittarius*-God, the old Centaur *Kirone*, the One with the Bow and the Arrows...

A Constellation, the *Sagittarius*, whose “hind Leg” resembled a sort of primitive Italy (Ithaca ?) in the Age of Atlantis, last Bastion of white People of Tyrrhenians, (“Taurou-Uioi”, Children of Tauris), always under Siege and wreaking War against the asian Armies of the great Dragon (I-CHING, second Hexagram, “... *Dragons fight in the Meadow. Their Blood is black and yellow*...”).

While the “Knee” of the *Sagittarius* seems to be Gibraltar, the “front Leg” the mountain Chain of the Atlantis, from Morocco to Tunisia, the “front Thigh” the Spain and Portugal, the “animal Torso” are the current France and Germany, the “small Cape” on his “Shoulders” are the Carpathian, the “human Chest” is England (“Dulicchio”, as “Long Island”, sung by Homer).

While the “Head” would be perfect to identify Scotland, landing Place of the last Survivors of a whole Continent that disappeared forever under the Waves of the Atlantic Ocean “...in the seventeenth Day of the Month of *Scorpio*...”, according to what the Egyptianes passed on, basically the ancient “Metide” from Greeks, the mysterious “Maud” of Celtikes, or “Ad”, in according to Arabes.

I was fascinated by that Show...

It was the Day that many People had celebrated for Thousands of Years, united by the same common Wish: Peace, Freedom, Life.

Whole Families were walking together in a Day which seemed to be full of Happiness and Hope for everyone...

Unfortunately, I realised it was no longer like that.

We had lost the War, less than Ten Hours earlier...

And I recalled an old Sentence, though I could no longer remember the Source, which reads more or less as follows:

“...When a bloody Dictatorship comes to an End, there’s only Violence, Blood and Pain, while the savage Dictators are dragged to the Gallows by the angry Crowds...

...But, when Freedom comes to an End, on the other hand, Nobody realises, because the innocent People is still shouting and crying their Joy for the Life, the Freedom and the Peace...”

Eighth Chapter: the Patient of Costa Rica

It was only after 3 pm on that fateful Day that I managed to collect my precious 23 medical Records.

We had lost...

From that Moment on I could only give brief medical Consultations, carefully avoiding any treatment Indication that may have involved medicinal Plants, now that They had been forbidden by Law.

The List of Plants was extremely long, so much so that i had to be careful in suggesting even “Red Onion” of Tropea and of Acquaviva delle Fonti.

But the long List I had downloaded from *Alliance for Natural Health International*, of the 16th February 2011, was far too clear (Alliance for Natural Health: Endangered EU Herb List).

Yet, I was still visited, at least for a Consultation, by Families from all over Italy, often with their own agricultural Lands or small Patches of Lands.

They had the medical Record of their loved one, who was waiting at Home or at the Hospital, often already undergoing Chemo-Therapy.

In these Cases, I had to end the kind Conversation promptly, escort them to the Door asking for no Compensation and hoping I hadn't said too much.

Until, 18 Months later, on 18th October 2012, an old Friend of mine sent Me a strange Message, which Radio Havana had clearly broadcasted “from Overseas”

And I understood that it wasn't over, it was still possible to fight, even though We had lost the Freedom to choose our Treatment, at least in Europe.

Perhaps, the final Match was going to be played in America, although not straight away, as I understood only seven Years later, in 2019...

2012 went and 2013 came.

The great Igino Pastrello, my Publisher, had once again pushed Me to write, and so I had my Book on the 23 clinical Cases translated into good scientific English and titled: “*Cancer Therapy: 23 clinical Cases of malignant Tumours cured without Chemo-Therapy*”.

As usual, I told the medical Contacts I had in the USA, Canada, Costa Rica, Brazil, Argentine, South-Africa, India, Australia and New Zelanda.

Many Countries in South-America showed some Interest in the Use of fresh medicinal Plants with the Cooperation of the Hospitals of the Indian Union.

I received a courtesy Visit from an italian Patient, who had been living in Costa Rica, for Years, and came to Me following the Advice of fellow Doctors who were treating him.

His medical Case reported a “previous” primitive bile duct Carcinoma (Cholangio-Carcinoma), large around 6 (Six) Centimeters, which had metastasized into the Liver, and had now “apparently REGRESSED”.

He had been treated in Costa Rica with no less than 16 Enemas with 30 fresh anti-cancer medicinal Plants based on “Ayurvedic” and “Spanish-Caribbean” Traditions, which had been performed over Six Months with the Cooperation of an Indian Team from New Delhi or Calcutta, and the Cancer had apparently regressed completely, with no need of Surgery....

2014 came, and nothing of note happened.

I still hadn’t closed my medical Clinic, but I felt it was Time to do so, before I got in serious Trouble.

I was visited by some Germans from Hamburg, and They told Me that the Situation was also grim in Germany.

They informed Me that no good News came from France, and in Great Britain there were talks of leaving the European Union...

Ninth Chapter: Boston

In 2015 something very important happened...

I received a Phone-Call from Boston: it was a young, female Voice who spoke in a measured Italian, almost as if She had learnt it in School, but tinged with an odd french Accent which made the Language sound extremely soft and pleasant.

I was reminded then, I don't know why, of the wonderful spanish Accent of that young cuban Doctoress who had come to Me in far 2004...

The Girl was reluctsnt to give Me too many Details regarding the Reason for calling that Night, except for the kind of Disease which was affecting her Brother, a Glioma.

She only said that was going to arrive with her other Brother, the youngest one, on a certain Day at the Airport of Aviano, and that the Date was set and could not be changed.

She asked if I could set an Appointment with her at my Clinic for that same Afternoon, because They were going to leave straight after, and that was why She was calling so early, since, She thought, I was bound to have other Appointments that Day.

I confirmed my availability, explained how to reach via Machiavelli 10 by Car, and We fixed the Appointment for the following Week.

It was only some Days later that, thinking again of that nice female Voice and her wonderful french Accent, I lingered on the strange Matter of Aviano.

The international Airport in Friuli Venezia Giulia is in "Ronchi dei Legionari", only Twenty Kilometers away from Trieste, on a handy Highroad.

Aviano is instead the feared american military Air Base which covers a large Portion of the former NATO Border, from where, in case of War, the fighter Planes were going to take off to intercept the soviet nuclear Bombers, and perhaps also the american Bombers directed to the Soviet Union with their same, horrible Cargo of Death...

Why would a Girl and One of her Brothers leave from Boston and land in an american military Base, over Hundred Kilometers from Trieste, when "Ronchi dei Legionari" was only Twenty Kilometers away ?

On the Phone, the Girl had also mentioned something that was going around a lot in America, the so called “EN HEI SI SI HAI THERAPY”, which I hadn’t been able to recognise.

In any case, I waited for her in my Clinic, in the early Afternoon of a Day in a Month I don’t remember, with all the scientific Material on how to treat Glioma I had at Home, and which had spent some Days reorganising, adding also a full Paper in Chinese, with Abstract in English, which had been published in China in 2000, and had taken Me Eight Years of vain Attempts to obtain it from the Chineses...

Unfortunately, the Consultation was extremely painful...

Tenth Chapter: 24th May 2017

You left on Wednesday Morning.

I had dozed off in the Armchair in the Bedroom where You were sleeping, with Mum's big Picture hanging in front of You, beside that of Us as Children: Stefano, Cristina and myself.

Below, the Photo of the Third Assault Fusilier Company of the "Sassari" Brigade which You commanded, and finally the Photo of Mario, from Lecce, who was honoured with "Medaglia d'Oro al Valor Militare", the Golden Medal of Military Valour.

I was beside You when it happened.

Only Four Days earlier We had celebrated your wedding Anniversary, but We didn't know it was going to be your last one.

You woke Me up suddenly, at 10:15 that Morning, after a whole Night spent watching over You:

...Peppone...!!!

Or perhaps it was only Your Thought that reached Me...

Sadly, Your Breathing had changed, and now You were holding my Hand tightly while watching Me.

Then it all ended, and You shut Your grey-green Eyes, Your Head tilting to the Right.

Following the Instructions You had left several Months earlier, I called Stefano, Five Minutes later.

I looked at the Clock: it was 10:35 on Wednesday 24 May 2017.

A beautiful sunny Day.

The Bora was blowing hard over Trieste...

You had finally joined Mum and Cristina, who was still a Child...

As I came to know one Year later, the “Last Survivors” of Your former Soldiers from the 151st and 152nd Brigade Regiments “Sassari” honoured You over Half of Sardinia, respecting Tradition...

Forty Days later.

Eleventh Chapter: Sonnenschein

Trieste, 9th July 2019.

The wide Square in front of the University was almost deserted, that nice, sunny Monday Morning.

There were no Clouds in the Sky.

Sudden cool Bora Wind gusts were blowing on the Top of the Hill where the imposing greek-roman Building had been built in 1938, and where, many Years before, when I was still studying Medicine, I often went and played Ball, careful not to break any Windows...

I looked around: Sonnenschein was not going to be late...

I saw her then, and immediately recognised her, even if She was still far away, by her elegant, quick-paced gait on the Stairs of the University...

Her large blue Eyes immediately opened wide when I showed her little Dedication I had written on the Cover of my Book "L'ultima Guerra di Atlantide"

-...*Alla più bella di tutte* ...- She read, laughing with Joy.

-...*Si, ma non dirlo a nessuno*...- I replied, admiring her appealing, golden "Sourcilles de Bichette",

-...*tranne che alla mamma*...- I finished.

Suddenly, Sonnenschein turned serious, and her innocent Face was crossed by something like a faint Shadow...

It saddened Me.

Perhaps She was thinking that, even though I could still practice as Doctor, I had given up.

I was weary after Eighteen Years of Battling, and I hoped She really understood the Reason why i had resolved to throw a Degree in Medicine and a specialisation Degree in Nuclear Medicine out of the Window, and why I had closed my medical Clinic...

She could see I was still enthusiastic, absorbed in the Studies I had begun at high School on ancient Greece, and often busy, in the last Months, reading and meditating on recent Italian Translations of the sacred “Kojiki”, my favourite Book at that moment...

She turned her Eyes to Me, staring at Me deep in Thought, and asked:

-...Will this cursed Night ever come to end ?

-...I had an old Friend in Cuba...-, I answered, feeling a stabbing Pain - ...but He left that Island in 2016...

She didn't get the Meaning of my Words, since I had never told her the Story of a proud, brave Cuban Doctress, who 15 Years earlier had risked her Life to save that of a Man who had always sacrificed himself for the Good of his People, never asking anything in Return...

-...And is there Nobody else ?

-...No, Nobody...Anyone who could help is now dead...

I stopped, not knowing whether to keep going.

In truth, in Moscow there was still a Russian that 17 Years before had sent a school Together of his to Me, but old Russia was too far away, and in any case He could no longer help the our innocent People...

Only the American was left, the One from 2015...

Then I added: *-...Only One is left...the Last One of Those Who Were...of Those Who still Believed in Value Like Freedom, True Freedom, Which Used to Exist in Europe and in America, and is perhaps Surviving still in Russia...*

But He's the Last One. When He's gone, there will be Nobody else, neither in America, nor in Europe...

...But who is He ?

...A Man from America...- I replied - ...but I can't tell you his Name, because his Son and his Daughter came to Me in Confidence...

Sonnenschein seemed surprised by the mysterious Story I was about to tell her, and sat beside Me, still thinking, in the Middle of the large Steps from which it's could overlook all Trieste and from where could see, on that clear, windy Morning all the way to “Pirano” ...

She focused, because She had understood that I was going to speak of something important, a Story that was worth her while...

For her it was News, since I tried never to talk about my Past, scattered with too many painful Event which I generally avoided mentioning, since I always risked recalling sad and painful Memories...

I far preferred telling her of the great ancient Myths, which I secretly made up especially for her, pretending They were true, which i had just finished translating from Greek, Latin, Sanskrit, Gaelic or the ancient Norse.

She was especially keen on her favourites, like the mysterious Braid of *Afrodite-Venus*, or the braided Hair of *Freya*, or *Isis's* wonderful golden Curls, or even the enchanted Braid of *Laksmi*, or *Draupadi's* Braid, or the blond One of *Helen*...

I used to tell her of the Heroes and the great Gods, like *Kryсна, Freyr, Paris, Kukulainn, Gilgamesh, Balder, Giasone, Lug, Hector, Horus, Iravan, Aeneas, Thor, Arjuna, Sigfrid, Rama, Mithra, Odino, Rostam, Indra, Wotan, Ulysses, Skidnir, or Heracles...*, who were granted, according to these Myths, One single Night to unravel those enchanted Braids, which were always tied in Twelve sacred Knots, and to which no Mortal could come close...

But She knew well that I was making those "ancient Stories", up especially for her, only to see her smile...

This Time, however, the Story was real and, hearing the different Tone of my Voice, a Shadow of Sadness touched her Face...

I heaved a Sign and started my Story:

-...Four Years ago, this American sent Two of his Three Children to Me, that is, his younger Son and his Daughter, who was the only One speaking Italian, although with a funny french Accent. They were also accompanied by another Girl...

They came for their older Brother, who was suffering from a brain Tumour and who died shortly Thereafter, although I dont't remember exactly when...

Sonnenschein focused her Attention even more, while I was trying to recall as well as possible what had happened Four Years earlier in that medical Consultation with those Three mysterious Americans...

It had been a strange Meeting from the way it had been set, since They had decided the Date, with only a few Days warning....

It was as if the Flight They were going to take from America to land in Aviano was a military Flight, which had been scheduled in advance, like the Journey taken every Week by an old Cargo Plane, perhaps a Hercules C-130, which left at Dawn from a certain City situated on the Coast of Atlantic, in order to take all necessary Supplies to the big Air Base in Aviano, as well as the new Recruits who had enlisted and other american military Personnel who were returning from Leave...

It was then leaving in the Evening with different Materials and Passengers, but this time finally returning Home, to the STATES...

That's why, when I saw the Two Gerls entering my humble Clinic, I thought They were Two Soldieress based in Aviano, immediately noticing their Clothes, which resembled military Ones, being practical and comfortable.

Strangely enough, though, both Girls, One blond, the other brown-haired, had long Hair, which complicated the Matter.

Finally, the younger Brother came in, also wearing military-like clothes.

They all sat down in front of my Desk where I had already prepared the Chairs, while I wondered who those Three Americans were, since They came from the Aviano Air Base, although non-military Personnel.

They broke the Ice first, the brown-haired Girl in particular, and I immediately recognised her Voice as the One who had called from Boston the Week before, with her soft french Accent.

She was sitting right in front of Me, the blond Girl to her right and her Brother on the left, all Three of them smiling as if They felt in a friendly Place...oddly enough, Eight Thousand Kilometers from Home...

But They were exhausted by the Flight, and I immediately thought back of the other Americans who had arrived in Trieste from Louisiana, so long ago, in June 2003. They had taken a scheduled Flight, changing in "Fiumicino", Roma, and landing in "Ronchi dei Legionari", even though the Dad was suffering from bone Metastasis caused by the prostate Cancer...

These Three Americans, who had come to Me for an urgent medical Consultation, had also undergone a rough Flight, it was clear from their tired, pale Faces.

It was as if They had not slept and the Plane had been One of the usual, old Cargo's Hold of a Hercules C-130 I had heard of from an italian Soldier...

This uncomfortable iron and aluminium Seats, lined along the plane Walls, the cold increasing while the Air-Cargo, italian or american, climbed higher and higher, until the Decompression made Hurt your Eadrum, and over there, in the Cargo's Hold where the Troops were also sitting, it almost made You throw up for the Lack of Air.

It started already when the Plane reached over Three Thousand Meters of Altitude before stabilising for the Flight at Five Thousand Meters, while the Soldiers leaned against the too-thin Walls of the Plane, watching fearfully the gigantic crawler Vehicles, and the different Cargo's Hold tied to the Middle of the Fuselage, never knowing if the Strings were really going to hold for the whole Flight...

It was the brown-haired Girl sitting in front of Me, and who had spoken to Me on the Phone with her nice french Accent, who broke the Ice, repeating that strange Sentence She had mentioned the Week before, and which I had absolutely not understood: "...*En Hei Si Si Hai Therapy...*"

I was puzzled, and She burst out laughing, took a Piece of Paper and One of the usual Pens scattered across my Desk, and wrote my Surname...

She than mentioned my old E-Book, still circulating online in INTERNET: "*Thousand Plants against Cancer without Chemo-Therapy*", while She handed Me the extensive clinical Documentation printed in good Italian, of the Patient "George Lincoln", and from which I was able to completely understand the resulting medical Situation, which She had already revealed on the Phone.

This way, in just a few Days I had been able to put together and prepare on my Clinic's Desk all the Documents I thought could be useful related to international scientific Research carried out on the Treatment of Glioma, which could perhaps save her Brother's Life, who was still in America...

The Ice melted, and for many Hours the brown-haired Girl, on behalf of the other Two who unfortunately struggled to understand Italian, discussed with Me the Matter of her Brother, and the Treatment He had followed up to than Point, at my Request, on the Question whether it was still possible to induce Apoptosis in neoplastic Cells of a Glioma in such an advanced Stage...

Whereas, I don't knew to reply to a specific Question regard as to Use of VIRUS against Cancer.

Then her Eyes fell on 4 (Four) Pages, written in Chinese, of Professor Tan, who had managed to reduce neoplastic Masses of Brain by 60% (Sixty per cent) in 30 (Threnty) out of 40 (Forty) Patients He had treated in Four Years, from 1994 to 1998, without Chemo-Therapy, but with a simple *Elemene* Vitamin, extracted from Turmeric and injected into the carotid Artery (Tan P.: *clinical Study on Treatment of 40 Cases of malignant brain Tumour by elemene emulsion Injection*, Chin. J. Integr. Trad. Western Med, 20, pp.: 645-648, 2000).

A scientific Paper that I had scrupulously kept in my Home since 2008, although I had wondered sometimes whether I was ever going to need it, since it was all in Chinese, except for the short “Abstract” written in English...

A Paper I had desperately dug out the “Tons” of clinical Documentations I had at Home, in those few Days after the Phone-Call from Boston...

But in that Moment, in my small Clinic, the medical Situation of her Brother was in such an advanced Stage, that it was going to be impossible to try and contact the Chinesees... We all knew that.

But since those Three Americans had arrived there, travelling over Eight Thousand Kilometers over the Ocean, I felt it was my duty to give them any flimsy Hope there may be, even though I had been in contact with the chinese Researchers only briefly and had to wait more than Eight Years of sending Letters, before I was able to obtain that Paper published in China in 2000, which I had to labour for with repeated Requests in my broken English...

In any Case, the Chinesees had answered to my Requests well, sending it to my House, with their usual Kindness of Old, a Sign of true Civility, once I had finally understood the correct mail Address in that vast, immense chinese “Middle Empire”.

After handing the chinese Text with its english Abstract to the Gerl who was interpreting for the other Two, We tried to identify more precisely the medical Conditions of her Brother, bringing to their Attention also other scientific Papers, almost all american and european Researchers, therefore written in good scientific English...

But then I let myself down, as I didn't pick up Pen and Paper, and start a Letter to her Father, “Mr. Lincoln”, as Honour demanded: a Letter written in Italian, but reporting my Thoughts on his Son's Condition, even if the Situation was too far gone, and the Disease was too far advanced.

It would have been my Duty to tell the Father what He actually already knew about his Son's medical Condition, since He had followed him during the whole painful Progression of the Disease...

I should have written out of the Respect I felt towards him, the Father of the Patient...

I should have then folden the Letter with my perfunctory Reply, formal and precise as it should be in such Situations, and given it to the Three young People sitting in front of Me, in my small Clinic, where I had joned them for that painful Consultation, aware of the Situation...

Three Americans who had taken on a full Day of travelling to reach Aviano from Boston, and then Trieste, perhaps by Car, I suppose...

Obviously, I had given them the usual perfunctory Pieces of Advice that all Doctors give the Relatives of cancer terminal Patients, clearly explaining the medical Situation, which They already knew.

But, I don't remembered the Father, the very One who had sent his Children for a last, desperate medical Consultation...

Chindren who, wanting to obey to their Father, despite knowing how desperate the Situation was, had still left at down from a military Base near Boston, flying almost Eight Thousand Kilometers at over Five Thousand Meters of Altitude, the Air stifled due the Decompression in the Fuselage of the old Cargo.

They had then landen in Aviano, only to leave that very Night for the STATES, again in the old Cargo's Hold of the same Plane, perhaps a Hercules C-130, together with other Americans, who, instead, were finally happy to return Home for their yearned-for leave, while They, huddled up in a Corner of the Plane, planned how to report to thier awaiting Father the painful Three Hour of Discussion They had with Me...

I stopped my long Narration and looked wearily in front of Me, the wide Gulf of Trieste stretching out under my gaze reaching well over “Pirano”.

Those Americans had been kind to Me, but I hadn’t been able to help them in any way, and I felt sorry.

And I had forgotten to write the medical Report for their Father, “Mr. Lincoln”, whose TRUE Name I still didn’t know.

I turned to Sonnenschein and added:

-...I don’t know why I forgot the Letter to their Father, but I let myself down...

... And I know for a Fact that I won’t have the Permission to able to ask for his Forgiveness...

The Bora suddenly started blowing from behind Sonnenschein, and She, to comfort Me, untied her long blond Hair, tilting her Head to the Side the Way She knew I liked, and I was enveloped by that wonderful golden Silk...

Finally, the World, the whole World could wait outside...

THE END

ENGLISH: Biography of Author

Giuseppe Nacci was born in Trieste in 1964. He achieved his medical Degree in Trieste in 1991 and later specialised in Nuclear Medicine at the University of Milano. In 2000 He published the Book “*La Terapia dei Tumori con Gadolinio 159 in Risonanza Magnetica Nucleare*”, with a view to a possible Use of the Radioisotope in Adro-Therapy. He also obtained the Patent for molecule Gadolinium 159-Biotin (No. 01313103).

But Life is ever-changing, and in 2001 sudden, tragic Events forced him to rethink completely his own Knowledge of MEDICINE, steering him to a new, different Path.

He spent Ten long Years studying BOTANY, and more specifically the Use of FRESH medicinal Plants in Apoptosis induction in human malignant cancer Cells, which are characterised by chromosome Aberrations (genetic mutations).

He honed his medical Skills on the Field, at a small private Clinic in Trieste, but, although He enriched his Curriculum in 2007 with his Book “*Diventa Medico di Te Stesso*”, published by “Editoriale Programma” from Treviso, his practice came to an End in April 2011, when Dr. Giuseppe Nacci stopped seeing Patients, as the new EU Regulations forbidding therapeutic Use of FRESH medicinal Plants came into Effect on the First May 2011.

This long, tormented “on the field” Experience begot Two Books: “*Guariti dal Cancro senza Chemio: 23 casi clinici documentati di guarigione*” and “*Cancer Therapy: 23 clinical Cases of malignant Tumours cured without Chemo-Therapy*”, Books published by “Editoriale Programma” from Treviso, beside a Book on the worldwide Threat of nuclear power Stations (“*Centrali nucleari: Chernobyl, Krsko, Fukushima, e dopo ? Conoscere il passato per preservare il futuro*”, and a Book on Diabetes (“*Come affrontare il Diabete*”), which were also published by “Editoriale Programma” in Treviso.

In 2013 He resumed his Studies in Geology, Astronomy and ancient Greek, which He had unfortunately neglected after Secondary School and University, thus tackling the great Mystery of ATLANTIS from a scientific Point of View. “Editoriale Programma” from Treviso published in 2018 the first of five Books on the Topic: “*L’Ultima Guerra di Atlantide, Vol. Primo: il Mondo Perduto*”, 364 pages).

Biografia dell'Autore

Giuseppe Nacci nasce a Trieste nel 1964. Laureatosi in Medicina e Chirurgia a Trieste nel 1991, si specializza successivamente in Medicina Nucleare presso l'Università di Milano. Nel 2000 pubblica il libro *“La Terapia dei Tumori con Gadolinio 159 in Risonanza Magnetica Nucleare”*, in vista di un possibile impiego dell'isotopo radioattivo in Adroterapia, e di cui ottiene il Brevetto di produzione per la molecola Gadolinio 159-Biotina (No. 01313103).

Ma la Vita è mutevole nei suoi accadimenti, e nel 2001 vicende improvvise e drammatiche lo costringono a rivedere completamente le proprie cognizioni di MEDICINA, portandolo su un nuovo e diverso percorso, che lo obbliga a dieci lunghi anni di studio nel campo della BOTANICA, e più precisamente nell'impiego delle Piante Medicinali FRESCHE per indurre l'Apoptosi nelle cellule umane tumorali maligne, caratterizzate, come noto, da Aberrazioni cromosomiche (mutazioni genetiche).

L'esperienza medica sul campo, presso un piccolo ambulatorio privato di Trieste, benchè arricchita nel 2007 dalla pubblicazione del libro *“Diventa Medico di Te Stesso”* della “Editoriale Programma” di Treviso, si conclude nell'Aprile del 2011, quando il dott. Giuseppe Nacci cessa di prendere in cura pazienti, a seguito dell'entrata in vigore, dal primo Maggio 2011, delle nuove leggi dell'Unione Europea che proibiscono, da allora, proprio l'uso terapeutico delle Piante Medicinali FRESCHE.

Rimangono così due libri di questa lunga e sofferta esperienza “sul campo”: *“Guariti dal Cancro senza Chemio: 23 casi clinici documentati di guarigione”* e *“Cancer Therapy: 23 Clinical Cases of Malignant Tumours cured without Chemo-Therapy”*, entrambi pubblicati dalla “Editoriale Programma” di Treviso, accanto ad un libro sulla minaccia rappresentata in tutto il mondo dalle centrali nucleari (*“Centrali nucleari: Chernobyl, Krsko, Fukushima, e dopo ? Conoscere il passato per preservare il futuro”*), e un libro sul diabete (*“Come affrontare il Diabete”*), anche questi pubblicati presso la “Editoriale Programma” di Treviso.

Dal 2013 riprende i suoi vecchi studi di Geologia, di Astronomia e di Greco antico, che aveva purtroppo trascurato dopo i tempi del Liceo e dell'Università, affrontando così il grande mistero dell'ATLANTIDE, analizzato però dal punto di vista scientifico, e di cui è uscito nel 2018, sempre presso la “Editoriale Programma” di Treviso, il primo dei cinque libri previsti sull'argomento: *“L'Ultima Guerra di Atlantide, Vol. Primo: il Mondo Perduto”*, 364 pagg).

DEUTSCH. Biographie von Author

Giuseppe Nacci wurde 1964 in Triest geboren. Nach seinem Studienabschluss in Medizin und Chirurgie 1991 in Triest spezialisierte er sich anschliessend an der Universität Mailand auf dem Gebiet der Nuklearmedizin.

Im Jahr 2000 veröffentlicht Dr. Nacci sein Buch *“La Terapia dei Tumori con Gadolinio 159 in Risonanza Magnetica Nucleare”*, im Hinblick auf einen möglichen Einsatz des radioaktiven Isotops in der Hadronen-Therapie, wofür er das Herstellungspatent für das Molekül Gadolinium 159-Biotin erwirbt (No. 01313103).

Das Leben gestaltet sich jedoch oft eigenwillig und 2001 zwingen ihn unvorhergesehene und dramatische Ereignisse, seine Auffassung von MEDIZIN vollständig zu überdenken und lassen ihn einen neuen, völlig anderen Weg einschlagen. Die nächsten 10 Jahre widmet er sich intensiv dem Studium der BOTANIK, im Speziellen untersucht er den Einsatz von FRISCHEN Heilpflanzen, die eine Apoptose von bösartigen Krebszellen beim Menschen einleiten. Letztere sind bekanntermassen von Veränderungen der Chromosomen (Genmutation) gekennzeichnet.

Seine medizinische Erfahrung auf diesem Gebiet, die er in seiner kleinen Privatpraxis in Triest weitergibt und die 2007 durch die Veröffentlichung von *“Diventa Medico di Te Stesso”* beim Verlag *“Editoriale Programma”* in Treviso zusätzlich bereichert wird, geht jedoch zu Ende, als Dr. Nacci im April 2011 die Patientenbetreuung aufgeben muss, nachdem neue EU-Gesetze ab 1. Mai 2011 den therapeutischen Einsatz von FRISCHEN Heilpflanzen verbieten. Zwei Bücher zeugen dennoch von dieser langen und hart erkämpften Erfahrung in diesem Bereich: *“Guariti dal Cancro senza Chemio: 23 casi clinici documentati di guarigione”* und *“Cancer Therapy: 23 Clinical Cases of Malignant Tumours cured without Chemo-Therapy”*, beide erschienen im Verlag *“Editoriale Programma”*. Ausserdem bringt derselbe Verlag zwei weitere seiner Bücher heraus: Ein Buch über die weltweite Bedrohung durch Atomkraftwerke (*“Centrali nucleari: Chernobyl, Krsko, Fukushima, e dopo ? Conoscere il passato per preservare il futuro”*), und eine Publikation zum Thema Diabetes (*“Come affrontare il Diabete”*).

Ab 2013 nimmt Dr. Nacci seine seit Universitäts und Gymnasialzeiten leider vernachlässigten Studien der Geologie, Astronomie und des Altgriechischen wieder auf und befasst sich nun mit dem grossen Mysterium von ATLANTIS, wobei er es vom naturwissenschaftlichen Standpunkt aus analysiert. Dazu ist kürzlich wieder bei dem genannten Verlag das erste von fünf zu diesem Thema vorgesehenen Büchern erschienen: *“L’Ultima Guerra di Atlantide, Vol. Primo: il Mondo Perduto”*, 364 S.).

DUTCH. Biografie van Auteur

Giuseppe Nacci is in 1964 geboren. In 1991 studeert hij aan de Universiteit van Trieste af in geneeskunde en volgt dan de olpeiding medisch specialist in nucleaire geneeskunde aan de Universiteit van Milaan. In 2000 publiceert hij het boek “*La Terapia dei Tumori con Gadolinio 159 in Risonanza Magnetica Nucleare*”, met het doel deze radioactieve isotoop in Hadron-Therapie te gebruiken. Hij vervolgens octrooi op de productie van Gadolinium 159-Biotine (No. 01313103).

In 2001 wordt hij door plotselinge en dramatische gebeurtenissen genoopt zijn MEDISCHE kennis te herzien, om een nieuw en ander parcours in te slaan.

Hij studeert dan tien jaar lang BOTANICA, waarbij hij zich vooral richt op het gebruik van VERSE medicinale planten om Apoptose te veroorzaken in kwaadaardige kankercellen, die door chromosoomafwijkingen gekenmerkt worden.

Op dit gebied doet hij ervaring op in een particuliere artspraktijk in Trieste, wat onder meer in 2007 uitmondt in de publicatie van het boek “*Diventa Medico di Te Stesso*”, uitgebracht door “Editoriale Programma” in Treviso.

In April 2011 houdt dokter Giuseppe Nacci op met patientenzorg, omdat er in de Europese Unie nieuwe wetten in werking zijn getreden die het gebruik van VERSE medicinale planten verbieden. Van zijn lange ervaring op dit gebied blijven er hoe dan ook twee boeken over: “*Guariti dal Cancro senza Chemio: 23 casi clinici documentati di guarigione*” en “*Cancer Therapy: 23 Clinical Cases of Malignant Tumours cured without Chemo-Therapy*”, die beide zijn uitgebracht door “Editoriale Programma” in Treviso. Ook heeft hij een boek gepubliceerd over de dreiging die in de hele wereld uitgaat van kerncentrales (“*Centrali nucleari: Chernobyl, Krsko, Fukushima, e dopo? Conoscere il passato per preservare il futuro*”), alsook een boek over diabetes (“*Come affrontare il Diabete*”), die eveneens bij “Editoriale Programma” in Treviso zijn gepubliceerd.

Sinds 2018 hervat hij de studie van Geologie, Astronomie en Oud-Grieks: vakken die hij helaas had verwaarloosd sedert de Universiteit en het Lyceum. Dit heeft hem ertoe gebracht het oude mysterie van ATLANTIS aan te snijden, met een analyse vanuit een wetenschappelijke invalshoek.

Zojuist is bij “Editoriale Programma” het eerste boek uitgebracht van de vijf over dit onderwerp geplande boeken: “*L’Ultima Guerra di Atlantide, Vol. Primo: il Mondo Perduto*”, 364 pages).
